<p align="center">Reviewing Complaints and Grievances</p>		

1.0 Purpose

The purpose of this Standard Operating Procedure is to outline the Foundation for the Accreditation of Cellular Therapy (FACT)’s process for responding to a complaint or grievance.

Situations may arise when FACT receives a complaint or grievance related to its business of accreditation. To ensure adequate, appropriate, and objective review of the complaint or grievance, the steps in this SOP must be followed. It is FACT’s goal to conduct investigations, derive conclusions, and enact remedial steps in a respectful and confidential manner to both the complainant and the subject of the complaint or grievance.

2.0 Scope

FACT will only review complaints and grievances that are specific to the Cellular Therapy Standards; the Cord Blood Standards; the FACT accreditation process; and/or FACT Board of Directors, committee members, inspectors, and/or staff. FACT does not address grievances related to the individual management of a patient unless it directly relates to a standard. FACT does not review any complaints related to unaccredited organizations.

This procedure is applicable to all FACT staff and volunteers when involved in a complaint or grievance. It is meant to be a descriptive outline of the review process. Due to the unique nature of complaints and grievances, it is not intended to be prescriptive regarding which avenues to explore during the review process. The goal of the procedure is to ensure adequate, objective review through the appropriate chains of command.

This procedure is not applicable to legal issues, in which case FACT’s legal counsel will direct the organization on which steps to take, if any.
