COMMON STANDARDS
FOR CELLULAR THERAPIES

NOTICE
These Standards are designed to provide minimum guidelines for organizations, facilities, and individuals performing cellular therapy product collection, processing, or administration or providing support services for such procedures. These Standards are not intended to establish best practices or include all procedures and practices that should be implemented if the standard of practice in the community or applicable governmental laws or regulations establish additional requirements. Each organization and individual should analyze its practices and procedures to determine whether additional standards apply. Compliance with these Standards is not an exclusive means of complying with the standard of care in the industry or community or with local, national, or international laws or regulations.

The Foundation for the Accreditation of Cellular Therapy expressly disclaims any responsibility for setting maximum standards and further expressly disclaims any responsibility, liability, or duty to member programs, directors, staff, or program donors or patients for any such liability arising out of injury or loss to any person by the failure of member programs, directors, or staff to adhere to the Standards or related guidance.

INTRODUCTION

In keeping with its objective of fostering continued development of cellular therapy, FACT is expanding its peer-developed standards development process to other cellular therapies. These draft Common Standards for Cellular Therapies are derived from current editions of FACT-JACIE Standards for hematopoietic cellular therapy and NetCord-FACT Standards for cord blood banking. They represent the basic fundamentals of cellular therapy that can be applied to any cell source or therapeutic application, and are intended to be used throughout product development and clinical trials. These Standards require the establishment of a quality management program and are intended to promote quality medical and laboratory practice in a broad range of cellular therapies.

These Common Standards could also serve as the basis for a new voluntary accreditation in basic cell therapy. Ideally, various discipline-specific or product specific standards would be added with the input, collaboration, and acceptance of those experts actively involved in the field and their clinical and laboratory programs that volunteer to comply with them.

These Common Standards are not intended to apply to hematopoietic cellular therapy programs or to cord blood banks, both disciplines in which more detailed and specific standards already exist, and FACT accreditation based on these specific standards is available.

Since 1996, FACT has been a leader in improving the quality of cellular therapy processes in the fields of hematopoietic progenitor cell (HPC) transplantation and cord blood banking through its program of professional standards and voluntary accreditation. FACT was founded by clinical and laboratory scientists (members of the American Society for Blood and Marrow Transplantation and the International Society for Cellular Therapy, respectively) to be the standard setting and accreditation arm of these societies, in the belief that quality medical and laboratory care would be enhanced through comprehensive, peer-developed professional standards. In addition, the founders sought to minimize unnecessary regulatory burden and protect an environment of research and development that permits advancement in the field. Since the first edition of Standards, FACT Standards have been developed by experts in the field, evidence-based whenever possible, and agreed upon by consensus. For those areas where there are few definitive publications, the Standards Committee weighs the available evidence from preclinical studies and accepted scientific theory. Minimal Standards have always required that there be in place a quality management program and that clinical outcomes are evaluated and reported. The standards development process includes drafting and review of standards by a committee consisting of experts in the particular use of a given cellular therapy, a period of public review and comment, and a final revision process based upon feedback received.

The basis for FACT accreditation in hematopoietic cellular therapy or cord blood banking is documented compliance with the current edition of these respective Standards. Accreditation is determined by evaluation of the written information provided by the applicant facility and by on-site inspection. All inspections are conducted by persons qualified by training and experience in cellular therapy who are affiliated with an accredited or applicant facility, have completed inspector training,
and have a working knowledge of FACT Standards and of their application to various aspects of the cellular therapy program.

Cellular therapy is an emerging and evolving field. Through these draft Common Standards, FACT is reaching out to experts who have experience utilizing cellular therapy products to improve outcomes in patients suffering from a variety of diseases and conditions. We value review and input as to the applicability of these common cellular therapy standards to a variety of therapies, identification of those requirements not believed to be generally applicable, and notation of any disease or product specific standards recommended as these continue to be built.
TERMINOLOGY, TENETS, ABBREVIATIONS, AND DEFINITIONS

PART A

A1 Terminology
A2 Tenets
A3 Abbreviations
A4 Definitions
PART A: TERMINOLOGY, TENETS, ABBREVIATIONS, AND DEFINITIONS

A1 TERMINOLOGY

For purposes of these Standards, the term *shall* means that the standard is to be complied with at all times. The term *should* indicates an activity that is recommended or advised, but for which there may be effective alternatives. The term *may* is permissive and is used primarily for clarity.

A2 TENETS

Basic tenets for compliance with these Standards include, but are not limited to:

A2.1 Where applicable laws and regulations include more stringent requirements than the Standards, those laws and regulations supersede the Standards. Conversely, when the Standards are more stringent than applicable laws and regulations, the Standards must be followed.

A2.2 Applicant organizations are responsible for providing verifiable documentation of evidence of compliance with these Standards.

A2.3 Standards that are not relevant to the services provided by the Program are not required; however, the burden to demonstrate that a requirement is not applicable rests with the applicant organization.

A3 ABBREVIATIONS

The following abbreviations cover terms used in these Standards:

A4 DEFINITIONS

Accompany: To go, be together with, or be available to the appropriate individual(s) electronically, but not affixed or attached. Written or printed information that must accompany a cellular therapy product must be in a sealed package with, or alternatively, be attached or affixed to, the cellular therapy product container.

Accreditation cycle: The period of time from the awarding of accreditation until its expiration as set, and subject to change, by FACT.

Advanced practice professional: Physician Assistant, Nurse Practitioner, or other Advanced Practitioner who provides primary patient care with physician oversight. Physician Assistants are formally trained and licensed or certified by the applicable authority to provide diagnostic, therapeutic, and preventive health care services with physician supervision. Advanced Practitioner of Nursing includes certified nurse anesthetists, nurse practitioners, certified nurse midwives, and clinical nurse specialists.

Adverse event: Any unintended or unfavorable sign, symptom, abnormality, or condition temporally associated with an intervention that may or may not have a causal relationship with the intervention, medical treatment, or procedure. Adverse reaction is a type of adverse event.

Adverse reaction: A noxious and unintended response suspected or demonstrated to be caused by the collection or infusion of a cellular therapy product or by the product itself.

Affix: To adhere in physical contact with the cellular therapy product container.

Allogeneic: The biologic relationship between genetically distinct individuals of the same species.

Apheresis: A medical technology in which the blood of a donor is separated into its component parts, the desired component is removed, and the remaining components are returned to the donor.

Aseptic technique: Practices designed to reduce the risk of microbial contamination of cellular therapy products, reagents, specimens, recipients, and/or donors.
Attach: To fasten securely to the cellular therapy product container by means of a tie tag or comparable alternative. Any information required to be attached to a cellular therapy product container may alternatively be affixed.

Attending physician: The physician responsible for the delivery and oversight of care provided to recipients of cellular therapy products and services.

Audit: Documented, systematic evaluation to determine whether approved policies or procedures have been properly implemented and are being followed.

Autologous: Derived from and intended for the same individual.

Available for distribution: The time at which the cellular therapy product may leave the control of the facility.

Biological product deviation: Any event associated with the manufacturing of a cellular therapy product, including testing, processing, packing, labeling, or storage, or with the holding or distribution, of a licensed biological product, if that event meets the following criteria:

Either:
- Represents a deviation from current good manufacturing practice (or current good tissue practices), applicable regulations, applicable standards, or established specifications that may affect the safety, purity, or potency of that product; or
- Represents an unexpected or unforeseeable event that may affect the safety, purity, or potency of that product; and
  - Occurs in your facility or another facility under contract with you; and
  - Involves a distributed biological product.

Calibrate: To set measurement equipment against a known standard.

CD34: The 115 kD glycoprotein antigen, expressed by 1-2% of normal bone marrow mononuclear cells, that is defined by a specific monoclonal antibody (anti-CD34) using the standardized cluster of differentiation (CD) terminology.

Cellular therapy: The administration of products with the intent of providing effector cells in the treatment of disease or support of other therapy.

Cellular therapy product: Somatic cell-based product (e.g. mobilized HPC, mononuclear cells, cord blood cells, mesenchymal stromal cells) that is procured from a donor and intended for processing and administration.

Chimerism testing: A diagnostic test (e.g., molecular, cytogenetic, or FISH) conducted after allogeneic stem cell or bone marrow transplantation to detect the relative ratio of donor and recipient cell populations in the peripheral blood and/or bone marrow. When chimerism is present, differences in allele types between the donor and recipient cells at several short tandem repeat loci are detectable.

Clinical Program: An integrated medical team housed in a defined location that includes at least a Clinical Program Director and demonstrates common staff training, protocols, procedures, quality management systems, clinical outcome analysis, and regular interaction among clinical sites.
**Collection:** Any procedure for procuring and labeling a cellular therapy product regardless of technique or source.

**Collection Facility:** An entity providing the service of cellular therapy product collection.

**Competency:** Ability to adequately perform a specific procedure or task according to direction.

**Complaint:** Any written, oral, or electronic communication about a problem associated with a cellular therapy product or with a service related to the collection, processing, storage, distribution, or administration of a cellular therapy product.

**Cord blood:** The whole blood, including HPC, collected from placental and umbilical cord blood vessels after the umbilical cord has been clamped.

**Corrective action:** Action taken to eliminate the causes of an existing discrepancy or other undesirable situation to prevent recurrence.

**Courier:** An individual trained and competent in transport or shipping of cellular therapy products.

**Critical:** The quality of any element employed in cellular therapy product manufacturing to potentially change the identity, purity, potency, or safety of the cellular therapy product if altered or omitted. “Element” includes, but is not limited to, materials, equipment, personnel, documents, or facility. For example, DMSO is a critical reagent because omitting it from the freezing medium will cause loss of cells during freezing and thawing.

**Current Good Tissue Practice:** The methods used in, and the facilities and controls used for, the manufacture of cellular therapy products to prevent the introduction or transmission of communicable diseases, including all steps in collection, donor screening and testing, processing, storage, labeling, packaging, and distribution.

**Current Good Manufacturing Practice:** The set of current practices followed by entities producing drug and biologic products, including cellular therapy products, to ensure that the products produced meet specific requirements for identity, strength, quality, and purity. In the US, cGMPs are enforced under Section 501(B) of the Federal Food, Drug, and Cosmetic Act (21USC351). Cellular therapy products that are extensively manipulated or that are used for non-homologous purposes are controlled under cGMP regulations. Similar requirements are delineated by the European Union as EU-GMP, and other countries such as United Kingdom, Australia, Canada, and Singapore have equally well-developed systems of regulations.

**Designee:** An individual with appropriate education, experience, or expertise who is given the authority to assume a specific responsibility. The person appointing the designee retains ultimate responsibility.

**Distribution:** Any transportation or shipment of a cellular therapy product that has been determined to meet release criteria or urgent medical need requirements.

**Donor:** A person who is the source of cells or tissue for a cellular therapy product.

**Donor advocate:** An individual distinct from the cellular therapy recipient’s primary treating physician whose main obligation is to protect the interests, well-being, and safety of the donor. The advocate may help the donor understand the process, the procedures, and the potential risks and benefits of donation.
**Electronic record:** A record or document consisting of any combination of text, graphics, or other data that is created, stored, modified, or transmitted in digital form by a computer.

**Critical electronic record:** Electronic record systems under facility control that are used as a substitute for paper, to make decisions, to perform calculations and to create and/or store information used in critical procedures.

**Eligible:** An allogeneic cellular therapy product donor who meets all donor screening and testing requirements related to transmission of infectious disease as defined by applicable laws and regulations.

**Errors and Accidents:** Any unforeseen or unexpected deviations from applicable regulations, standards, or established specifications that may affect the safety, purity, or potency of a cellular therapy product.

**Facility:** A location where activities covered by these Standards are performed, including, but not limited to, determination of donor eligibility or suitability, product collection, processing, storage, distribution, issue, or administration.

**Fellow:** A physician who is in a training program in a medical specialty after completing residency, usually in a hospital or academic setting.

**Fresh:** A cellular therapy product that has never been cryopreserved.

**Human cells, tissues, or cellular or tissue-based products (HCT/Ps):** Articles containing or consisting of human cells or tissues that are intended for implantation, transplantation, infusion, or transfer into a human recipient.

**Ineligible:** An allogeneic cellular therapy product donor who does not meet all donor screening and testing requirements related to transmission of infectious disease as defined by applicable laws and regulations.

**Institutional Review Board or Ethics Committee:** A Board or Committee established by an institution in accordance with the regulations of the relevant governmental agency to review biomedical and behavioral research that involves human subjects and is conducted at or supported by that institution.

**ISBT 128:** A global standard for the identification, labeling, and information transfer of human blood, cell, tissue, and organ products.

**Key position:** A job category with responsibilities that significantly affect the provision of service or product safety and quality.
Labeling: Steps taken to identify the original cellular therapy product collection and any products or product modifications, to complete the required reviews, and to attach the appropriate labels.

Late Effect: A health problem that occurs months or years after a disease is diagnosed or after treatment has been administered. Late effects may be caused by the primary disease or its treatment, and may include physical, mental, and/or social problems.

Licensed health care professional: An individual who has completed a prescribed program of health-care related study and has been certified or licensed by the applicable authority in the jurisdiction in which he or she is performing services to perform duties within the scope of practice of that certificate or license.

Manipulation: An ex vivo procedure that selectively removes, enriches, expands, or functionally alters HPC products.

Minimally Manipulated: Processing that does not alter the relevant biological characteristics of cells or tissues.

More than minimally manipulated: Processing that does alter the relevant biological characteristics of cells or tissues. Products that are more than minimally manipulated are referred to as Advanced Therapy Medicinal Products in the European Union.

Unmanipulated: A cellular therapy product as obtained at collection and not subjected to any form of processing.

Manufacturing: Activity that includes, but is not limited to, any or all steps in the recovery, processing, packaging, labeling, storage, or distribution of any human cellular or tissue-based product, and/or the screening and testing of a cell or tissue donor.

Marrow collection: Harvest of bone marrow for transplantation to achieve hematopoietic reconstitution in the recipient or for further cellular therapy product manufacture. This does not include marrow aspirations intended for diagnostic purposes.

Materials management: An integrated process for planning and controlling all steps in the acquisition and use of goods or supply items (materials) used for the collection or processing of cellular therapy products to determine whether these materials are of adequate quality and quantity and available when needed. The materials management system combines and integrates the material selection, vendor evaluation, purchasing, expediting, storage, distribution, and disposition of materials.

Microbial: Related to infectious agents including bacterial and fungal organisms.

Negative selection: The manipulation of a cellular therapy product such that a specific cell population(s) is reduced.

Nurse Practitioner: A nurse with a graduate degree in advanced practice nursing who is licensed or certified by the applicable authority to provide patient services in defined areas of practice in collaboration with other health professionals.

Orientation: An introduction to guide one in adjusting to new surroundings, employment, or activity.

Outcome analysis: The process by which the results of a therapeutic procedure are formally assessed.
Partial label: The minimum essential elements that must be affixed to all cellular therapy product containers at all times.

Policy: A document that defines the scope of an organization, explains how the goals of the organization will be achieved, and/or serves as a means by which authority can be delegated.

Positive selection: The manipulation of a cellular therapy product such that a specific cell population(s) is enriched.

Potency: The therapeutic activity of a product as indicated by appropriate laboratory tests or adequately developed and controlled clinical data.

Preventive action: Action taken to eliminate the cause and prevent occurrence of a potential discrepancy or other undesirable situation.

Procedure: A document that describes in detail the process or chronological steps taken to accomplish a specific task; a procedure is more specific than a policy.

Process: A goal-directed, interrelated series of actions, events, or steps.

Process control: The standardization of processes in order to produce predictable output.

Process development: The series of procedures performed in order to develop a final process that achieves the required results.

Processing: All aspects of manipulation, cryopreservation, packaging, and labeling of cellular therapy products regardless of source, including microbial testing, preparation for administration or storage, and removal from storage. Processing does not include collection, donor screening, donor testing, storage, or distribution.

Processing Facility: A location where cellular therapy product processing activities are performed in support of a Clinical Program. A Processing Facility may be part of the same institution as the Clinical Program or may be part of another institution and perform these functions through contractual agreement.

Product sample: A representative quantity of product removed from the cellular therapy product; an aliquot.

Proficiency test: A test to evaluate the adequacy of testing methods and equipment and the competency of personnel performing testing.

Protocol: A written document describing steps of a treatment or procedure in sufficient detail such that the treatment or procedure can be reproduced repeatedly without variation.

Purity: Relative freedom from extraneous matter in the finished product, whether or not harmful to the recipient or deleterious to the product.

Qualification: The establishment of confidence that equipment, supplies, and reagents function consistently within established limits.

Quality: Conformance of a product or process with pre-established specifications or standards.
**Quality assurance**: The actions, planned and performed, to provide confidence that all systems and elements that influence the quality of the product or service are working as expected individually and collectively.

**Quality assessment**: The actions, planned and performed, to evaluate all systems and elements that influence the quality of the product or service.

**Quality audit**: A documented, independent inspection and review of a facility’s quality management activities to verify, by examination and evaluation of objective evidence, the degree of compliance with those aspects of the quality program under review.

**Quality control**: A component of a quality management program that includes the activities and controls used to determine the accuracy and reliability of the establishment’s personnel, equipment, reagents, and operations in the manufacturing of cellular therapy products, including testing and product release.

**Quality improvement**: The actions, planned and performed, to implement changes designed to improve the quality of a product or process.

**Quality management**: An integrated program of quality assessment, assurance, control, and improvement.

**Quality management plan**: A written document that describes the systems in place to implement the quality management program.

**Quality management program**: An organization’s comprehensive system of quality assessment, assurance, control, and improvement. A quality management program is designed to prevent, detect, and correct deficiencies that may adversely affect the quality of the cellular therapy product or increase the risk of communicable disease introduction or transmission. May also be referred to as the quality management system.

**Quarantine**: The identification or storage of a cellular therapy product in a physically separate area clearly identified for such use, or through use of other procedures such as automated designation to prevent improper release of that product. Also refers to segregated storage of products known to contain infectious disease agents to reduce the likelihood of cross-contamination.

**Record**: Documented evidence that activities have been performed or results have been achieved. A record does not exist until the activity has been performed.

**Release**: Removal of a product from quarantine or in-process status when it meets specified criteria.

**Release criteria**: The requirements that must have been met before a cellular therapy product may leave the control of the Collection or Processing Facility.

**Resident**: A physician in one of the postgraduate years of clinical training. The length of residency varies according to the specialty.

**Responsible person**: A person who is authorized to perform designated functions for which he or she is trained and qualified.

**Safety**: Relative freedom from harmful effects to persons or products.
**Shipping:** The physical act of transferring a cellular therapy product within or between facilities. During shipping the product leaves the control of trained personnel at the distributing or receiving facility.

**Standard Operating Procedures (SOP) Manual:** A compilation of policies and procedures with written detailed instructions required to perform procedures. The SOP Manual may be in electronic or paper format.

**Standards:** The current edition of the *FACT Common Standards for Cellular Therapies*, which may be referred to herein as “Standards” or “FACT Standards.”

**Storage:** Holding a cellular therapy product for future processing, distribution, or administration.

**Suitable:** Donor and recipient suitability refers to issues that relate to the general health of the donor and recipient. In relation to the donor, it refers to the donor’s medical fitness to undergo the collection procedure. In relation to the recipient, it refers to the recipient’s medical fitness to undergo the therapy.

**Syngeneic:** The biologic relationship between identical twins.

**Time of collection:** The time of day at the end of the cellular therapy product collection procedure.

**Trace:** To follow the history of a process, product, or service by review of documents.

**Track:** To follow a process or product from beginning to end.

**Transplantation:** The transfer of cellular therapy product from one individual to another distinct individual.

**Transport:** The physical act of transferring a cellular therapy product within or between facilities. During transportation the product does not leave the control of trained personnel at the transporting or receiving facility.

**Unique:** Being the only one of its kind or having only one use or purpose.

**Unique identifier:** A numeric or alphanumeric sequence used to designate a given cellular therapy product with reasonable confidence that it will not be used for another purpose.

**Unplanned deviation:** The action of departing from an established course or accepted standard without intent.

**Urgent medical need:** A situation in which no comparable cellular therapy product is available and the recipient is likely to suffer death or serious morbidity without the cellular therapy product.

**Validation:** Confirmation by examination and provision of objective evidence that particular requirements can consistently be fulfilled. A process is validated by establishing, by objective evidence, that the process consistently produces a cellular therapy product meeting its predetermined specifications.

**Variance:** A planned deviation from recommended practice or standard operating procedure; occurs with documented approval as the best course of action when adherence to the established course or accepted standard was not feasible or possible. Also, a practice that is not compliant with a FACT standard that is indicated with the term, “should.”
Verification: The confirmation of the accuracy of something or that specified requirements have been fulfilled.

 Verification typing: HLA typing performed on an independently collected sample with the purpose of verifying concordance of that typing assignment with the initial HLA typing assignment. Concordance does not require identical levels of resolution for the two sets of typing but requires the two assignments be consistent with one another.

Viability: Living cells as defined by dye exclusion, flow cytometry, or progenitor cell culture.

Written: Documentation in human readable form.
## CLINICAL PROGRAM STANDARDS

**PART B**

- **B1** General
- **B2** Clinical Unit
- **B3** Personnel
- **B4** Quality Management
- **B5** Policies and Procedures
- **B6** Allogeneic and Autologous Donor Selection, Evaluation, and Management
- **B7** Recipient Care
- **B8** Clinical Research
- **B9** Data Management
- **B10** Records
PART B: CLINICAL PROGRAM STANDARDS

SECTION B1: GENERAL

B1.1 The Clinical Program shall consist of an integrated medical team that includes at least a Clinical Program Director and one additional physician housed in a defined location(s).

B1.1.1 The Clinical Program shall demonstrate common staff training, protocols, procedures, quality management systems, clinical outcome analysis, and regular interaction among all clinical sites.

B1.2 The Clinical Program shall use a cell collection process and processing facility that meet FACT Standards with respect to their interactions with the Clinical Program.

B1.3 The Clinical Program shall abide by all applicable laws and regulations.

B1.3.1 The Clinical Program shall be licensed, registered, or accredited as required by the appropriate governmental authorities for the activities performed.

B1.4 The Clinical Program shall have a designated team that includes a Clinical Program Director and a minimum of one (1) other physician trained and/or experienced in cellular therapy. The designated team shall have been in place for at least twelve (12) months preceding initial accreditation.

B1.5 The Clinical Program shall comply with the Minimum Number of New Patients for Accreditation table in Appendix I.

SECTION B2: CLINICAL UNIT

B2.1 A clinical unit of adequate space, design, and location shall be identified for the treatment of patients needing inpatient care related to the cellular therapy.

B2.1.1 The inpatient program shall have an intensive care unit or equivalent coverage available.

B2.2 There shall be a designated area for outpatient care that protects the patient from transmission of infectious agents and allows, as necessary, for appropriate patient isolation; administration of intravenous fluids, medications, and blood products; and confidential donor examination and evaluation.
<table>
<thead>
<tr>
<th>Section</th>
<th>Text</th>
</tr>
</thead>
<tbody>
<tr>
<td>B2.3</td>
<td>Outpatient facilities shall have a plan for providing access to an intensive care unit or equivalent coverage for patients who may become critically ill.</td>
</tr>
<tr>
<td>B2.4</td>
<td>When preparative medications, cellular therapy product administration, or initial post-administration care are provided in an ambulatory setting, there shall be a plan for providing admission to inpatient facilities. This plan shall include rapid access to an intensive care unit or equivalent coverage for patients who may become critically ill.</td>
</tr>
<tr>
<td>B2.5</td>
<td>Facilities used by the Clinical Program shall be maintained in a clean, sanitary, and orderly manner.</td>
</tr>
<tr>
<td>B2.6</td>
<td>There shall be provisions for prompt evaluation and treatment by a physician who specializes in the therapeutic disease area available on a 24-hour basis.</td>
</tr>
<tr>
<td>B2.7</td>
<td>There shall be attending physician oversight if general medical physicians or advanced practice professionals provide care to transplant patients.</td>
</tr>
<tr>
<td>B2.8</td>
<td>There shall be a pharmacy providing 24-hour availability of medications needed for the care of cellular therapy patients.</td>
</tr>
<tr>
<td>B2.9</td>
<td>If HLA matching of the recipient and the cellular therapy product is required, Clinical Programs shall use HLA testing laboratories appropriately accredited by the American Society for Histocompatibility and Immunogenetics (ASHI), European Federation for Immunogenetics (EFI), or other accrediting organization providing other services appropriate for the care of transplant patients.</td>
</tr>
<tr>
<td>B2.10</td>
<td>The Clinical Program shall be operated in a manner designed to minimize risks to the health and safety of employees, patients, donors, visitors, and volunteers.</td>
</tr>
<tr>
<td>B2.11</td>
<td>The Clinical Program shall have a written safety manual that includes instructions for action in case of exposure to communicable disease; and to chemical, biological, or radiological hazards.</td>
</tr>
</tbody>
</table>

SECTION B3: PERSONNEL

B3.1 CLINICAL PROGRAM DIRECTOR
B3.1.1 The Clinical Program Director shall be a physician appropriately licensed to practice medicine in the jurisdiction in which the Clinical Program is located and shall have achieved specialist certification in the applicable therapeutic disease area. Physicians trained prior to requirements for specialty training may serve as Clinical Program Director if they have documented experience in the applicable therapeutic disease area extending over ten (10) years.

B3.1.2 The Clinical Program Director shall have two (2) years of experience as an attending physician responsible for the direct clinical management of patients in the applicable therapeutic disease area in the inpatient and outpatient settings.

B3.1.3 The Clinical Program Director shall be responsible for administrative and clinical operations, including compliance with these Standards and applicable laws and regulations.

B3.1.4 The Clinical Program Director shall be responsible for all elements of the design of the Clinical Program including quality management, the selection and care of patients and donors, and cell collection and processing, whether internal or contracted services.

B3.1.5 The Clinical Program Director shall have oversight of the medical care provided by all members of the Clinical Program including medical care provided by the physicians on the cellular therapy team.

B3.1.5.1 The Clinical Program Director shall be responsible for verifying the knowledge and skills of the cellular therapy team.

B3.1.6 The Clinical Program Director shall participate in ten (10) hours of educational activities related to cellular therapy.

B3.2 ATTENDING PHYSICIANS

B3.2.1 Clinical Program attending physicians shall be appropriately licensed to practice medicine in the jurisdiction of the Clinical Program and should be specialist certified or trained in the therapeutic disease area.

B3.2.2 There shall be at least one attending physician who has achieved specialist certification in the applicable therapeutic disease area.

B3.2.3 Clinical Program attending physicians shall participate in ten (10) hours of educational activities related to cellular therapy.
B3.3 TRAINING FOR CLINICAL PROGRAM DIRECTORS AND ATTENDING PHYSICIANS

B3.3.1 Attending physicians shall each have a minimum total of one year of supervised training in the management of patients in the applicable therapeutic disease area in both inpatient and outpatient settings.

B3.3.2 Clinical Program Directors and attending physicians shall have received specific training and maintain competency in each of the following areas:

   B3.3.2.1 Indications for cellular therapy
   B3.3.2.2 Selection of suitable patients and treatments.
   B3.3.2.3 Donor and recipient informed consent.
   B3.3.2.4 Donor selection, evaluation, and management.
   B3.3.2.5 Cellular therapy product administration and patient management.
   B3.3.2.6 Adverse events associated with cellular therapy.
   B3.3.2.7 Management of anticipated complications of cellular therapy.
   B3.3.2.8 Monitoring and management of pain.
   B3.3.2.9 Evaluation of post-treatment cellular therapy outcomes.
   B3.3.2.10 Evaluation of late effects of cellular therapy.
   B3.3.2.11 Documentation and reporting for patients on investigational protocols.

B3.3.3 If applicable to the cellular therapy product, specific clinical training and competency required for physicians in Clinical Programs requesting accreditation for allogeneic cellular therapy shall include:

   B3.3.3.1 Donor eligibility determination.
B3.3.3.2 Methodology and implications of human leukocyte antigen (HLA) typing.

B3.3.3.3 Management of patients receiving ABO incompatible cellular therapy products.

B3.3.3.4 Management of patients receiving xenogeneic products.

B3.3.4 The attending physicians shall be knowledgeable in the following procedures:

B3.3.4.1 Cellular therapy product collection.

B3.3.4.2 Cellular therapy product processing.

B3.3.4.3 Cellular therapy product cryopreservation.

B3.3.4.4 Preparation and administration of cellular therapy products.

B3.3.4.5 Adverse events following administration of cellular therapy products.

B3.4 PHYSICIANS IN TRAINING

B3.4.1 Physicians in training shall be appropriately licensed to practice in the jurisdiction of the Clinical Program. They shall be limited to the scope of practice of their licenses and within parameters of their training and appropriately supervised.

B3.4.2 Physicians in training shall have received specific training and maintain competency in the therapeutic-related skills that they routinely practice. These skills shall be documented and may include but are not limited to those listed in B3.3.3 and B3.3.4.

B3.4.3 Physicians in training shall participate in five (5) hours of educational activities related to cellular therapy.

B3.5 ADVANCED PRACTICE PROFESSIONALS
B3.5.1 Advanced practice professionals shall be licensed to practice in the jurisdiction of the Clinical Program and shall be limited to the scope of practice of their licenses and within parameters of their training.

B3.5.2 Advanced practice professionals shall have received specific training and maintain competency in the therapeutic-related skills that they routinely practice. These skills shall be documented and may include but are not limited to those listed in B3.3.3 and B3.3.4.

B3.5.3 Advanced practice professionals shall participate in five (5) hours of educational activities related to cellular therapy.

B3.6 CLINICAL PROGRAM TEAM

B3.6.1 Clinical Programs treating pediatric patients shall have a team trained in the management of pediatric patients.

B3.6.2 If marrow is utilized in the cellular therapy product, the Clinical Program shall have access to licensed physicians who are trained and competent in marrow collection and a marrow collection facility that meets these Standards.

B3.6.3 If mononuclear cells derived from peripheral blood by apheresis are utilized in the cellular therapy product, the Clinical Program shall have access to personnel who are trained and competent in cellular therapy product collection by apheresis and an apheresis collection facility that meets these Standards.

B3.7 NURSES

B3.7.1 The Clinical Program shall have nurses formally trained and experienced in the management of patients in the therapeutic disease area. Programs treating pediatric patients shall have nurses formally trained and experienced in the management of pediatric patients in the therapeutic disease area.

B3.7.2 Training and competency shall include:

B3.7.2.1 Administration of preparative regimens, if applicable.

B3.7.2.2 Administration of cellular therapy products.
B3.7.2.3 Care interventions to manage transplant complications, including, but not limited to, neutropenic fever, infectious and noninfectious processes, mucositis, nausea and vomiting, and pain management.

B3.7.2.4 Recognition of cellular therapy complications and emergencies requiring rapid notification of the clinical team.

B3.7.3 There shall be written policies for all relevant nursing procedures, including, but not limited to:

B3.7.3.1 Care of immunocompromised patients.

B3.7.3.2 Administration of preparative regimens.

B3.7.3.3 Administration of cellular therapy products.

B3.7.3.4 Administration of blood products.

B3.7.4 There shall be an adequate number of nurses experienced in the care of patients in the applicable therapeutic disease area.

B3.7.5 There shall be a nurse/patient ratio satisfactory to manage the severity of the patients’ clinical status.

B3.8 CONSULTING SPECIALISTS

B3.8.1 The Clinical Program shall have access to certified or trained consulting specialists and/or specialist groups who are capable of assisting in the management of patients requiring medical care in the following key disciplines as applicable to the cellular therapy products:

B3.8.1.1 Surgery.

B3.8.1.2 Pulmonary medicine.

B3.8.1.3 Intensive care.
B3.8.1.4 Gastroenterology.

B3.8.1.5 Nephrology.

B3.8.1.6 Infectious disease.

B3.8.1.7 Cardiology.

B3.8.1.8 Pathology.

B3.8.1.9 Psychiatry.

B3.8.1.10 Radiology.

B3.8.1.11 Transfusion medicine.

B3.8.1.12 Neurology.

B3.8.1.13 Dermatology.

B3.8.1.14 Radiation Therapy.

B3.8.1.15 Anesthesiology.

B3.8.1.16 Interventional Radiology.

B3.8.1.17 Cardiothoracic Surgery.

B3.8.1.18 Neurosurgery.

B3.8.2 A Clinical Program treating pediatric patients shall have consultants, as defined in B3.9.1, qualified to manage pediatric patients.

B3.9 QUALITY MANAGEMENT SUPERVISOR
B3.9.1 There shall be a Clinical Program Quality Management Supervisor to establish and maintain systems to review, modify, and approve all policies and procedures intended to monitor compliance with these Standards and/or the performance of the Clinical Program.

B3.9.2 The Clinical Program Quality Management Supervisor shall participate in five (5) hours of educational activities related to cellular therapy and/or quality management.

B3.10 SUPPORT SERVICES STAFF

B3.10.1 The Clinical Program shall have one or more designated staff with appropriate training and education to assist in the provision of pre-cellular therapy product administration patient evaluation, treatment, and appropriate post-administration follow-up and care. Designated staff shall include the following as applicable to the cellular therapy product:

B3.10.1.1 Pharmacy staff knowledgeable in the use and monitoring of pharmaceuticals used by the Clinical Program.

B3.10.1.2 Dietary staff capable of providing dietary consultation regarding the nutritional needs of the cellular therapy recipient, including enteral and parenteral support, and appropriate dietary advice to avoid food-borne illness.

B3.10.1.3 Social Services staff.

B3.10.1.4 Psychology Services staff.

B3.10.1.5 Physical Therapy staff.

B3.10.1.6 Data Management staff sufficient to comply with B9.

SECTION B4: QUALITY MANAGEMENT

B4.1 There shall be an overall Quality Management Program that incorporates the information from clinical, collection, and processing as appropriate.
B4.1.1 The Clinical Program shall establish and maintain a written Quality Management Plan.

B4.2 The Quality Management Plan shall include, or summarize and reference, an organizational chart of key positions and functions within the cellular therapy program, including clinical, collection, and processing activities, as applicable.

B4.2.1 The Quality Management Plan shall include a description of how these key positions interact to implement the quality management activities.

B4.2.2 The Clinical Program Director or designee shall be responsible for the Quality Management Plan.

B4.2.3 The Clinical Program Director or designee shall have authority over and responsibility for ensuring that the Quality Management Program is effectively established, documented, and maintained.

B4.2.4 The Clinical Program Director or designee shall not have oversight of his/her own work if this person also performs other tasks in the Clinical Program.

B4.2.5 The Clinical Program Director or designee shall report on quality management activities, at a minimum, quarterly.

B4.2.6 The Clinical Program Director shall annually review the effectiveness of the performance of the Quality Management Program.

B4.3 The Quality Management Plan shall include, or summarize and reference, policies and Standard Operating Procedures for each key position in the Clinical Program. Personnel requirements shall include at a minimum:

B4.3.1 A current job description for all staff.

B4.3.2 A system to document the following for all medical, nursing, and advanced practice professional staff:

B4.3.2.1 Initial qualifications.

B4.3.2.2 New employee orientation.
B4.3.2.3 Initial training and retraining when appropriate for all procedures performed.

B4.3.2.4 Competency for each critical function performed.

B4.3.2.5 Continued competency at least annually.

B4.3.2.6 Continuing education.

B4.3.3 A policy and/or procedure for personnel training and competency assessment.

B4.4 The Quality Management Plan shall include, or summarize and reference, policies and procedures for development, approval, validation, implementation, review, revision, and archival of all critical documents.

B4.4.1 There shall be a current listing of all active critical documents that shall comply with the document control system requirements. Controlled documents shall include at a minimum:

B4.4.1.1 Policies and Standard Operating Procedures.

B4.4.1.2 Worksheets.

B4.4.1.3 Forms.

B4.4.1.4 Labels.

B4.4.2 The document control policy shall include:

B4.4.2.1 A standardized format for policies, procedures, worksheets, and forms.

B4.4.2.2 Assignment of numeric or alphanumeric identifier and title to each document and document version regulated within the system.

B4.4.2.3 A procedure for document approval, including the approval date, signature of approving individual(s), and the effective date.
B4.4.2.4 A system to protect controlled documents from accidental or unauthorized modification.

B4.4.2.5 A system for document change control that includes a description of the change, the signature of approving individual(s), approval date(s), effective date, and archival date.

B4.4.2.6 Archived policies and procedures, the inclusive dates of use, and their historical sequence shall be maintained for a minimum of ten (10) years from archival or according to governmental or institutional policy, whichever is longer.

B4.4.2.7 A system for the retraction of obsolete documents to prevent unintended use.

B4.4.3 There shall be a process for the regular review of records and for the assessment of record review to identify recurring problems, potential points of failure, or need for process improvement.

B4.5 The Quality Management Plan shall include, or summarize and reference, policies and procedures for establishment and maintenance of written agreements with third parties whose services impact the clinical care of the patient and/or donor or the quality of the cellular therapy product.

B4.5.1 Agreements shall include the responsibility of the third-party facility performing any step in collection, processing, or testing to comply with applicable laws and regulations and these Standards.

B4.5.2 Agreements shall be dated and reviewed on a regular basis.

B4.6 The Quality Management Plan shall include, or summarize and reference, policies and procedures for documentation and review of outcome analysis and product efficacy to verify that the procedures in use consistently provide a safe and effective product.

B4.6.1 Safety endpoints and the criteria for cellular therapy product efficacy and/or the clinical outcome shall be determined and shall be reviewed at regular time intervals.

B4.6.2 Both individual cellular therapy product data and aggregate data shall be evaluated.
B4.6.3 Review of outcome analysis and product efficacy shall include at a minimum:

B4.6.3.1 An endpoint of clinical function as approved by the Clinical Program Director.

B4.6.3.2 Overall and treatment-related morbidity and mortality at one hundred (100) days and one (1) year after cellular therapy product administration.

B4.6.4 Data on outcome analysis and product efficacy, including adverse events related to the recipient, donor, and/or product, shall be provided in a timely manner to entities involved in the collection, processing, and/or distribution of the cellular therapy product.

B4.7 The Quality Management Plan shall include, or summarize and reference, policies, procedures, and a schedule for conducting, reviewing, and reporting audits of the Clinical Program’s activities to verify compliance with elements of the Quality Management Program and operational policies and procedures.

B4.7.1 Audits shall be conducted on a regular basis by an individual with sufficient expertise to identify problems, but who is not solely responsible for the process being audited.

B4.7.2 The results of audits shall be used to recognize problems, detect trends, identify improvement opportunities, implement corrective and preventive actions when necessary, and follow up on the effectiveness of these actions in a timely manner.

B4.7.3 Audits shall include, at a minimum:

B4.7.3.1 Accuracy of data contained in the CIBMTR Cellular Therapy for Regenerative Medicine form or the EBMT Minimum Essential Data-A forms.

B4.7.3.2 Donor screening and testing.

B4.7.3.3 Management of cellular therapy products with positive microbial culture results.

B4.7.3.4 External facilities performing critical contracted services under agreements to evaluate whether the requirements of the agreements have been met.
B4.8 The Quality Management Plan shall include, or summarize and reference, policies and procedures on the management of cellular therapy products with positive microbial culture results that address at a minimum:

B4.8.1 Notification of the recipient.

B4.8.2 Recipient follow-up and outcome analysis.

B4.8.3 Follow-up of the donor, if relevant.

B4.8.4 Reporting to regulatory agencies if appropriate.

B4.8.5 Criteria for the administration of cellular therapy products with positive microbial culture results.

B4.9 The Quality Management Plan shall include, or summarize and reference, policies and procedures for errors, accidents, severe adverse events, biological product deviations, and complaints, including the following activities at a minimum:

B4.9.1 Detection.

B4.9.1.1 There shall be a defined process improvement plan that includes policies or procedures for the recognition of all issues that require corrective action.

B4.9.1.2 Record reviews shall identify deviations from policy or procedure and from specified acceptance or release criteria.

B4.9.2 Investigation.

B4.9.2.1 The Clinical Program shall conduct a thorough investigation in collaboration with the Collection Facility and Processing Facility as appropriate.

B4.9.2.2 Investigations shall include a description of the event, the involved individuals and/or cellular therapy products, when the event occurred, when and to whom the event was reported, and the immediate actions taken.
B4.9.2.3 Investigations shall identify the root cause and plan for short- and long-term corrective actions as warranted.

B4.9.2.4 There shall be a system to notify the Clinical Program Director of any event requiring investigation at the time the investigation is initiated.

B4.9.2.1 Investigations shall include a description of the event including the root cause and plan for short- and long-term corrective actions as warranted.

B4.9.3 Documentation.

B4.9.3.1 Cumulative files of errors, accidents, biological product deviations, serious adverse events, and complaints shall be maintained.

B4.9.3.2 Cumulative files shall include written investigation reports containing conclusions, follow-up, and corrective actions, that where applicable are linked to the record(s) of the involved cellular therapy products.

B4.9.3.3 After completion, all investigation reports shall be reviewed in a timely fashion by the Clinical Program Director or designee and Quality Management.

B4.9.4 Reporting.

B4.9.4.1 When it is determined that the cellular therapy product was responsible for an adverse reaction, the reaction and results of the investigation shall be reported to the recipient’s physician, other facilities participating in the manufacturing of the cellular therapy product, registries, and governmental agencies as required by Applicable Law or these Standards.

B4.9.4.2 Errors, accidents, biological product deviations, and complaints shall be reported to other facilities performing cellular therapy product functions on the affected cellular therapy product and to the appropriate regulatory and accrediting agencies, registries, grant agencies, and IRBs or Ethics Committees as necessary.

B4.9.5 Corrective and preventive action.
B4.9.5.1 Corrective action shall be implemented and documented as indicated, including both short-term action to address the immediate problem and long-term action to prevent the problem from recurring.

B4.9.5.2 Follow-up audits of the effectiveness of corrective actions shall be performed in a timeframe as indicated in the investigative report.

B4.9.6 Documentation of each adverse event that occurs in the Clinical Program shall be reviewed in a timely manner by the Clinical Program Director.

B4.9.7 A written description of the adverse event shall be made available to the recipient’s and/or donor’s physician and the Collection and Processing Facilities, if appropriate.

B4.9.8 Deviations from the following key Standard Operating Procedures, B5.1.1, B5.1.4, B5.1.6, and B5.1.8, shall be documented.

B4.9.9.1 Unplanned deviations and associated corrective actions shall be reviewed by the Clinical Program Director or designee.

B4.9.10 There shall be a defined process to obtain feedback from patients or legally authorized representatives.

B4.10 The Quality Management Plan shall include, or summarize and reference, policies and procedures for cellular therapy product tracking and tracing that allow tracking from the donor to the recipient or final disposition and tracing from the recipient or final disposition to the donor.

B4.11 The Quality Management Plan shall include, or summarize and reference, policies and procedures for actions to take in the event the Clinical Program’s operations are interrupted.

B4.12 The Quality Management Plan shall include, or summarize and reference, policies and procedures for qualification of critical reagents, supplies, equipment, and facilities used for the collection procedure.

B4.12.1 Qualification plans shall be reviewed and approved by the Clinical Program Director or designee.
B4.13 The Quality Management Plan shall include, or summarize and reference, policies and procedures for validation and/or verification of the collection procedure to achieve the expected end-points, including viability of cells and cellular therapy product characteristics.

B4.13.1 Each validation shall include:

B4.13.1.1 A validation plan, including conditions to be validated.

B4.13.1.2 Acceptance criteria.

B4.13.1.3 Data collection.

B4.13.1.4 Evaluation of data.

B4.13.1.5 Summary of results.

B4.13.1.6 Documentation of review and acceptance of the methodology by the QM Supervisor or designee.

B4.13.1.7 Review and approval by the Collection Facility Medical Director or designee of the validation results and conclusions.

B4.13.2 Changes to a process with the potential to affect the potency, viability, or purity of the cellular therapy product shall include evaluation of risk to confirm that they do not create an adverse impact anywhere in the operation and shall be validated or verified as appropriate.

SECTION B5: POLICIES AND PROCEDURES

B5.1 The Clinical Program shall establish and maintain policies and/or procedures addressing critical aspects of operations and management in addition to those required in B4. These documents shall include all elements required by these Standards and shall address at a minimum:

B5.1.1 Recipient evaluation, selection, and treatment.

B5.1.2 Donor and recipient confidentiality.
B5.1.3 Donor and recipient consent.

B5.1.4 Donor screening, testing, eligibility determination, selection, and management.

B5.1.5 Infection prevention and control.

B5.1.6 Preparation of the recipient prior to cellular therapy product administration.

B5.1.7 Administration of blood products.

B5.1.8 Administration of cellular therapy products, including products under exceptional release.

B5.1.9 Duration and conditions of cellular therapy product storage and indications for disposal.

B5.1.10 Facility management.

B5.1.11 Disposal of medical and biohazard waste.

B5.1.12 Emergency and disaster plan, including the Clinical Program response.

---

B5.2 The Clinical Program shall maintain a detailed Standard Operating Procedures Manual that includes a listing of all current Standard Operating Procedures, including title, identifier, and version.

---

B5.3 Standard Operating Procedures shall be sufficiently detailed and unambiguous to allow qualified staff to follow and complete the procedures successfully. Each individual procedure shall include:

B5.3.1 A clearly written description of the objectives.

B5.3.2 A description of equipment and supplies used.

B5.3.3 Acceptable end-points and the range of expected results.
B5.3.4 A stepwise description of the procedure.

B5.3.5 Reference to other Standard Operating Procedures or policies required to perform the procedure.

B5.3.6 A reference section listing appropriate literature.

B5.3.7 Documented approval of each procedure by the Clinical Program Director or designated physician prior to implementation and every two years thereafter.

B5.3.8 Documented approval of each procedural modification by the Clinical Program Director or designated physician prior to implementation.

B5.3.9 A current version of orders, worksheets, reports, labels, and forms.

B5.4 Standard Operating Procedures relevant to processes being performed shall be readily available to the facility staff.

B5.5 All personnel shall follow the Standard Operating Procedures related to their positions.

B5.6 Variances shall be pre-approved by the appropriate Processing Facility Director and/or Medical Director, and quality management as appropriate.

B5.7 Review and/or training by a staff member shall be documented before the staff member is allowed to perform new and revised policies and procedures.

B5.8 There shall be a process to address age-specific issues in the Standard Operating Procedures.

SECTION B6: ALLOGENEIC AND AUTOLOGOUS DONOR SELECTION, EVALUATION, AND MANAGEMENT

B6.1 AUTOLOGOUS AND PATIENT-SPECIFIC ALLOGENEIC CELLULAR THERAPY PRODUCTS

B6.1.1 There shall be written criteria for allogeneic and autologous donor selection, evaluation, and management by trained medical personnel.
B6.1.1.1 Written criteria shall include criteria for the selection of allogeneic donors who are minors.

B6.1.1.2 Written criteria shall include criteria for the selection of allogeneic donors when more than one donor is available and suitable.

B6.1.2 The collection procedure shall be explained in terms the donor can understand, and shall include the following information at a minimum:

B6.1.2.1 The risks and benefits of the procedure.

B6.1.2.2 Tests and procedures performed on the donor to protect the health of the donor and the recipient.

B6.1.2.3 The rights of the donor and legally authorized representative of the donor who is a minor to review the results of such tests according to applicable laws and regulations.

B6.1.2.4 Alternative collection methods.

B6.1.2.5 Protection of medical information and confidentiality.

B6.1.3 The donor shall have an opportunity to ask questions.

B6.1.4 The donor shall have the right to refuse to donate.

B6.1.4.1 The allogeneic donor shall be informed of the potential consequences to recipient of such refusal.

B6.1.5 Donor informed consent for the cellular therapy product donation shall be obtained and documented by a licensed health care professional familiar with the collection procedure.

B6.1.5.1 Informed consent from the allogeneic donor shall be obtained by a licensed health care professional other than the intended recipient’s primary transplant physician.
B6.1.6 In the case of a minor donor, informed consent shall be obtained from the donor’s legally authorized representative in accordance with applicable laws and regulations and shall be documented.

B6.1.7 The allogeneic donor shall give informed consent and authorization prior to release of information on the donor’s health and appropriateness to donate to the recipient’s physician and/or the recipient.

B6.1.8 The donor shall be informed of the policy for cellular therapy product discard, including actions taken when an intended recipient no longer requires the cellular therapy product.

B6.1.8.1 Documentation of consent shall be available to the Collection Facility staff prior to the collection procedure.

B6.1.9 There shall be criteria and evaluation procedures in place to protect the safety of donors during the process of cellular therapy product collection.

B6.1.9.1 Any abnormal finding shall be reported to the prospective donor with documentation in the donor record of recommendations made for follow-up care.

B6.1.9.2 Allogeneic donor suitability shall be evaluated by a licensed health care professional who is not the primary physician or health care professional overseeing care of the recipient.

B6.1.9.3 Autologous donors shall be tested as required by applicable laws and regulations.

B6.1.9.4 The risks of donation shall be evaluated and documented.

B6.1.10 Pregnancy testing and counseling shall be performed for all female donors with childbearing potential within seven (7) days prior to preparation for collection, and, as applicable, within seven (7) days prior to initiation of the allogeneic recipient’s preparative regimen.

B6.1.11 Laboratory testing of all donors shall be performed by a laboratory that is accredited, registered, or licensed in accordance with applicable laws and regulations.
B6.1.12  Allogeneic donor infectious disease testing shall be performed using one or more screening tests approved or cleared by the governmental authority.

B6.1.13  The Clinical Program shall inform the Collection Facility and Processing Facility of donor test results or if any testing was not performed.

B6.1.14  A donor advocate shall be available to represent allogeneic donors who are minors or who are mentally incapacitated.

B6.1.15  Issues of donor health that pertain to the safety of the collection procedure shall be communicated in writing to the collection staff.

B6.1.16  There shall be a policy for follow-up of donors that includes routine management and the management of collection-associated adverse events.

B6.1.17  For allogeneic products containing red blood cells sufficient to cause a transfusion reaction, donors and recipients shall be tested for ABO group and Rh type using two independently collected samples. Discrepancies shall be resolved and documented prior to issue of the cellular therapy product.

B6.1.18  When relevant, a red cell antibody screen shall be performed on allogeneic recipients.

B6.1.19  Allogeneic donors shall be evaluated for risk factors that might result in disease transmission from the cellular therapy product by medical history, physical examination, examination of relevant medical records, and laboratory testing.

B6.1.20  When appropriate for the cellular therapy product, the medical history for allogeneic donors shall include at least the following:

   B6.1.20.1  Vaccination history.

   B6.1.20.2  Travel history.

   B6.1.20.3  Blood transfusion history.

   B6.1.20.4  Questions to identify persons at high risk for transmission of communicable disease as defined by the applicable governmental authority.
B6.1.20.5 Questions to identify persons at risk of transmitting inherited conditions.

B6.1.20.6 Questions to identify persons at risk of transmitting a hematological or immunological disease.

B6.1.20.7 Questions to identify a past history of malignant disease.

B6.1.20.8 The allogeneic donor shall confirm that all the information provided is true to the best of his/her knowledge.

B6.1.21 Within thirty (30) days prior to collection, blood samples from allogeneic cellular therapy product donors shall be drawn and tested for evidence of clinically relevant infection by the following communicable disease agents using tests as required by applicable laws and regulations:

B6.1.21.1 Human immunodeficiency virus, type 1.

B6.1.21.2 Human immunodeficiency virus, type 2.

B6.1.21.3 Human T cell lymphotrophic virus I.

B6.1.21.4 Human T cell lymphotrophic virus II.

B6.1.21.5 Hepatitis B virus.

B6.1.21.6 Hepatitis C virus.

B6.1.21.7 Treponema pallidum (syphilis).

B6.1.22 If required by applicable laws and regulations, blood samples from allogeneic HPC donors shall also be drawn and tested within thirty (30) days prior to collection for evidence of clinically relevant infection by the following disease agents:

B6.1.22.1 West Nile Virus.

B6.1.22.2 Trypanosoma cruzi (Chagas' Disease).
B6.1.23 Additional tests shall be performed as required to assess the possibility of transmission of other infectious or non-infectious diseases.

B6.1.24 For viable, lymphocyte rich cells, including mononuclear cells and other cellular therapy products, blood samples from allogeneic donors shall be drawn and tested for communicable disease agents listed in B6.1.21 and B6.1.22. These tests shall be performed seven (7) days prior to or after collection in the U.S. or 30 days prior to collection in European Union member states, or in accordance with applicable laws and regulations.

B6.1.25 Allogeneic donors shall be tested for CMV (unless previously documented to be positive).

B6.1.26 Allogeneic donors and recipients shall be tested at a minimum for HLA loci determined by the Clinical Program Director to be of importance to the cellular therapy product by a laboratory accredited by ASHI, EFI, or other appropriate organization.

B6.1.26.1 DNA high resolution molecular typing shall be used for Class II typing, if indicated.

B6.1.26.2 Verification typing shall be performed on the selected allogeneic donor using an independently collected sample. Results shall be confirmed prior to collection.

B6.1.26.3 When relevant to the cellular therapy product, there shall be a policy for anti-HLA antibody testing for mismatched donors and recipients.

B6.1.27 Allogeneic donor eligibility, as defined by applicable laws and regulations, shall be determined by a physician after history, exam, medical record review, and testing, and shall be documented in the recipient’s medical record before the recipient is prepared for administration and before the allogeneic donor begins mobilization regimen, if applicable.

B6.1.28 Records required for donor eligibility determination shall be in English or translated into English when crossing international borders.

B6.1.29 The use of an ineligible allogeneic donor shall require documentation of the rationale for his/her selection and suitability by the administering physician, urgent medical need documentation, and the documented informed consent of the donor and the recipient.
B6.1.30 Allogeneic donor eligibility and suitability shall be communicated in writing to the Collection and Processing Facilities.

B6.1.31 There shall be a policy covering the creation, regular review, and retention of allogeneic donor records.

B6.1.31.1 Allogeneic donor records shall include donor eligibility determination, including the name of the responsible person who made the determination and the date of the determination.

B6.2 ALLOGENEIC CELLULAR THERAPY PRODUCTS MANUFACTURED FOR MULTIPLE RECIPIENTS

B6.2.1 At the time of selection for administration, the Clinical Program shall request all technical data from the cellular therapy product manufacturing facility regarding the product after processing prior to cryopreservation, including at a minimum:

B6.2.1.1 Total nucleated cell count.

B6.2.1.2 Viability and/or potency, if applicable.

B6.2.1.3 Microbial cultures from the cellular therapy product after processing prior to cryopreservation.

B6.2.1.4 ABO group and Rh type, if applicable.

B6.2.1.5 All HLA Class I and II typing results.

B6.2.1.6 Communicable disease testing results performed on the donor.

B6.2.1.7 Risks of communicable and/or genetic diseases disclosed by the donor medical and genetic screening or clinical chart review and the results of any investigation or further testing performed.

B6.2.1.8 The method of processing.

B6.2.1.9 Any variances in collection, processing, testing, cryopreservation, storage, and/or transport or shipping procedures that may influence the integrity and/or quality of the cellular therapy product.
FACT Common Standards

DRAFT

43

B6.2.1.10 Physical characteristics of the cellular therapy product, including at a minimum the number and type of bags or compartments used for storage.

SECTION B7: RECIPIENT CARE

B7.1 The attending physician shall verify the availability and suitability of a donor or cellular therapy product prior to preparing the recipient for cellular therapy.

B7.1.1 The clinical service shall notify the Processing Facility prior to requesting a cellular therapy product from a cord blood bank, registry, or other facility.

B7.2 There shall be a policy addressing safe administration of the preparative regimen, if applicable.

B7.2.1 The treatment orders shall include the patient height and weight, specific dates of administration, daily doses (if appropriate), and route of administration of each agent.

B7.2.2 Preprinted orders or electronic equivalents shall be used for protocols and standardized regimens. These orders shall be verified and documented by an attending physician.

B7.3 There shall be a policy addressing safe administration of cellular therapy products.

B7.3.1 Two (2) qualified persons shall verify the identity of the recipient and the product and the order for administration prior to the administration of the cellular therapy product.

B7.3.2 There shall be documentation in the recipient’s medical record of the administered cellular therapy product unique identifier, initiation and completion times of administration, and any adverse events related to administration.

B7.3.3 A circular of information for cellular therapy products shall be available to staff.

B7.3.4 There shall be a procedure for reporting adverse events to the IRB, sponsor, applicable governmental agencies, and other relevant organizations.
SECTION B8: CLINICAL RESEARCH

B8.1 Clinical Programs shall have formal review of investigational treatment protocols and patient consent forms by a process that is approved by the appropriate governmental and institutional authorities, if required by applicable laws and regulations.

B8.1.1 Those Clinical Programs utilizing investigational treatment protocols shall have in place a pharmacy equipped for research activities, including a process for tracking, inventory, and secured storage of investigational drugs.

B8.2 Documentation for all research protocols performed by the Clinical Program shall be maintained in accordance with institutional policies and applicable laws and regulations, including audits; approvals by the Institutional Review Board, Ethics Committee, or equivalent; correspondence with regulatory agencies; and any adverse events.

B8.3 For clinical research, informed consent shall be obtained from each research subject or legally authorized representative, in language he or she can understand, and under circumstances that minimize the possibility of coercion or undue influence.

B8.3.1 Interpretation and translation shall be performed by individuals qualified to provide these services in the clinical setting.

B8.3.2 Family members and legally authorized representatives shall not serve as interpreters or translators.

B8.3.3 The research subject or legally authorized representative shall be given the opportunity to ask questions and to have his/her questions answered to his/her satisfaction, and to withdraw from the research without prejudice.

B8.3.4 Informed consent for a research subject shall contain the following elements at a minimum and comply with applicable laws and regulations:

B8.3.4.1 An explanation of the research purposes, a description of the procedures to be followed, and the identification of investigational procedures.

B8.3.4.2 The expected duration of the subject’s participation.

B8.3.4.3 A description of the reasonably expected risks, discomforts, benefits to the subject and others, and alternative procedures.
B8.3.4.4 A statement of the extent to which confidentiality will be maintained.

B8.3.4.5 An explanation of the extent of compensation for injury.

B8.4 There shall be a process in place to address the disclosure of any issues that may represent a conflict of interest in clinical research.

SECTION B9: DATA MANAGEMENT

B9.1 The Clinical Program shall collect all the data contained in the CIBMTR Cellular Therapy for Regenerative Medicine Form or the EBMT Cell Therapy Minimum Essential Data-A form.

SECTION B10: RECORDS

B10.1 Clinical Program records related to quality control, personnel training or competency, facility maintenance, facility management, complaints, or other general facility issues shall be retained for a minimum of ten (10) years by the Clinical Program, or longer in accordance with applicable laws and regulations, or with a defined program or institutional policy.

B10.1.1 Employee records shall be maintained in a confidential manner and as required by applicable laws and regulations.

B10.1.2 The Clinical Program shall maintain records of identification codes of personnel including methods to link the name and/or signature to the initials or other identification codes used in other documents and records. These records shall include dates of employment.

B10.2 Patient and donor records including, but not limited to, consents and records of care, shall be maintained in a confidential manner as required by applicable laws and regulations for a minimum of ten (10) years after the administration of the cellular therapy product, or, if not known, ten (10) years after the date of the distribution, disposition, or expiration, whichever requires the longest maintenance period.

B10.3 Research records shall be maintained in a confidential manner as required by applicable laws and regulations for a minimum of ten (10) years after the administration, distribution, disposition, or expiration of the cellular therapy product, whichever is latest.

B10.4 RECORDS IN CASE OF DIVIDED RESPONSIBILITY
B10.4.1 If two (2) or more facilities participate in the collection, processing, or administration of the cellular therapy product, the records of each facility shall show plainly the extent of its responsibility.

B10.4.2 The Clinical Program shall furnish outcome data, in so far as they concern the safety, purity, or potency of the cellular therapy product involved, to other facilities involved in the collection or processing of the cellular therapy product.
COLLECTION STANDARDS

PART C

C1 General
C2 Collection Facility
C3 Personnel
C4 Quality Management
C5 Policies and Procedures
C6 Allogeneic and Autologous Donor Evaluation and Management
C7 Coding and Labeling of Cellular Therapy Products
C8 Process Controls
C9 Cellular Therapy Product Storage
C10 Cellular Therapy Product Transportation and Shipping
C11 Records
PART C: COLLECTION STANDARDS

SECTION C1: GENERAL

C1.1 These Standards apply to the collection activities of all cellular therapy products collected from living donors.

C1.1.1 Responsibility for the collection of tissues used as starting material for cellular therapy products shall be designated.

C1.2 Collected cellular therapy products shall be distributed to cell processing facilities that meet the Standards with respect to their role in the collection process.

C1.3 Collection shall comply with applicable laws and regulations.

C1.3.1 If required by applicable laws and regulations, collections shall be performed in a facility licensed, registered, and/or accredited as required by the appropriate governmental authority for the activities performed.

SECTION C2: COLLECTION ACTIVITIES

C2.1 There shall be appropriate designated areas for collection of cellular therapy products, for collected products, and for storage of supplies, reagents, and equipment.

C2.1.1 There shall be a process to control storage areas to prevent mix-ups, contamination, and cross-contamination of all products prior to release or distribution.

C2.1.2 There shall be a process for confidential donor examination and evaluation.

C2.2 There shall be adequate lighting, ventilation, and access to sinks during collection to prevent the introduction, transmission, or spread of communicable disease.

C2.3 When using collection methods that may result in contamination or cross-contamination of cellular therapy products, critical environmental conditions shall be controlled for temperature, humidity, ventilation, air quality, and surface contaminates.
C2.4 Environmental conditions shall be controlled to protect the safety and comfort of patients, donors, and personnel.

C2.5 The areas in which collection is performed and cellular therapy products are stored shall be maintained in a clean, sanitary, and orderly manner.

C2.5.1 There shall be documentation of facility cleaning and sanitation to achieve adequate conditions for operations.

C2.6 There shall be adequate equipment and materials for the procedures performed.

C2.7 There shall be access to an intensive care unit and/or emergency services.

C2.8 The facility in which collection is performed shall be operated in a manner designed to minimize the risks to the health and safety of employees, patients, donors, visitors, and volunteers.

C2.9 There shall be a written safety manual that includes instructions for action in case of exposure to communicable disease; and to chemical, biological, or radiological hazards.

SECTION C3: PERSONNEL

C3.1 MEDICAL DIRECTOR OF COLLECTION ACTIVITIES

C3.1.1 There shall be A Medical Director who is a licensed physician with postgraduate training in the methods required for cell collection and/or the therapeutic disease area.

C3.1.2 The Medical Director or designee shall be responsible for the following elements:

C3.1.2.1 All technical procedures.

C3.1.2.2 Performance of the collection procedure.

C3.1.2.3 Supervision of staff.
C3.1.2.4 Administrative operations.

C3.1.2.5 The medical care of donors undergoing cell collection.

C3.1.2.6 Pre-collection evaluation of donors at the time of donation.

C3.1.2.7 Care of any complications resulting from the collection procedure.

C3.1.2.8 The Quality Management Program, including compliance with these Standards and other applicable laws and regulations.

C3.1.3 The Medical Director shall have at least one year experience in cellular therapy product collection procedures.

C3.1.4 The Medical Director shall participate in ten (10) hours of educational activities related to cellular therapy product collection and/or the therapeutic disease area.

C3.2 QUALITY MANAGEMENT SUPERVISOR

C3.2.1 There shall be a Quality Management Supervisor for collection activities to establish and maintain systems to review, modify, and approve all policies and procedures intended to monitor compliance with these Standards and/or the performance of the collection activities.

C3.2.2 The Quality Management Supervisor shall participate in five (5) hours of educational activities related to cellular therapy, cell collection, and/or quality management.

C3.3 STAFF

C3.3.1 Collection shall be performed by licensed health care professionals who are trained and competent in cell collection.

C3.3.2 There shall be adequate numbers of trained collection personnel available.

C3.3.3 If there is only one designated staff member qualified to perform cellular therapy product collection, there shall be other qualified individual(s) to serve as back-up as needed to maintain sufficient coverage.

FACT Common Standards
DRAFT

50
For collection activities involving pediatric donors, physicians and collection staff shall have documented training and experience in performing these procedures.

SECTION C4: QUALITY MANAGEMENT

C4.1 Collection activities shall be performed in compliance with a written Quality Management Plan.

C4.2 The Quality Management Plan shall include, or summarize, and reference, an organizational chart of key positions and functions required for collection.

C4.2.1 The Quality Management Plan shall include a description of how these key positions interact to implement the quality management activities.

C4.2.2 The Medical Director or designee shall be responsible for the Quality Management Plan as it pertains to collection activities.

C4.2.3 The Medical Director or designee shall have authority over and responsibility for ensuring that the Quality Management Program is effectively established and maintained.

C4.2.4 The Medical Director or designee shall not have oversight of his/her own work if this person also performs other tasks related to cellular therapy product collection.

C4.2.5 The Medical Director or designee shall report on quality management activities, at a minimum, quarterly.

C4.2.6 The Medical Director or designee shall annually review the effectiveness of the Quality Management Program. This report shall also be provided to the Clinical Program Director, as applicable.

C4.3 The Quality Management Plan shall include, or summarize and reference, policies and Standard Operating Procedures for each key position required for cellular therapy product collection. Personnel requirements shall include at a minimum:

C4.3.1 A current job description for all staff.

C4.3.2 A system to document the following for all staff:
C4.3.2.1 Initial qualifications.

C4.3.2.2 New employee orientation.

C4.3.2.3 Initial training and retraining when appropriate, for all procedures performed.

C4.3.2.4 Competency for each critical function performed.

C4.3.2.5 Continued competency at least annually.

C4.3.2.6 Continuing education.

C4.3.3 A description of minimal trainer qualifications, including level of experience and education, and a uniform plan for staff training.

C4.4 The Quality Management Plan shall include, or summarize and reference, policies and procedures for development, approval, validation, implementation, review, revision, and archival of all critical documents.

C4.4.1 There shall be a current listing of all active critical documents that shall comply with the document control system requirements. Controlled documents shall include at a minimum:

C4.4.1.1 Policies and Standard Operating Procedures.

C4.4.1.2 Worksheets.

C4.4.1.3 Forms.

C4.4.1.4 Labels.

C4.4.2 The document control policy shall include:

C4.4.2.1 A standardized format for policies, procedures, worksheets, forms, and labels.
C4.4.2.2 Assignment of numeric or alphanumeric identifier and title to each document and document version regulated within the system.

C4.4.2.3 A procedure for document approval, including the approval date, signature of approving individual(s), and the effective date.

C4.4.2.4 A system to protect controlled documents from accidental or unauthorized modification.

C4.4.2.5 A system for document change control that includes a description of the change, the signature of the approving individual(s), approval date, effective date, and archival and date.

C4.4.2.6 A procedure for preparation, approval, implementation, review, revision, and archival of all policies and procedures.

C4.4.2.7 Archived policies and procedures, the inclusive dates of use, and their historical sequence shall be maintained for a minimum of ten (10) years from archival or according to governmental or institutional policy, whichever is longer.

C4.4.2.8 A system for the retraction of obsolete documents to prevent unintended use.

C4.4.2.9 A system for record creation, assembly, review, storage, archival, and retrieval.

C4.5 The Quality Management Plan shall include, or summarize and reference, policies and procedures for establishment and maintenance of written agreements with third parties whose services impact the cellular therapy product or clinical care of the donor.

C4.5.1 Agreements shall include the responsibility of the facility performing any step in collection, processing, or testing to comply with applicable laws and regulations and these Standards.

C4.5.2 Agreements shall be dated and reviewed on a regular basis.

C4.6 The Quality Management Plan shall include, or summarize and reference, policies and procedures for documentation and review of outcome analysis and product efficacy to verify that the procedures in use consistently provide a safe and effective product.
C4.6.1 Criteria for cellular therapy product, safety, product efficacy, and/or, the clinical outcome shall be determined and shall be reviewed at regular time intervals.

C4.6.2 Both individual cellular therapy product data and aggregate data shall be evaluated.

C4.7 The Quality Management Plan shall include, or summarize and reference, policies, procedures, and a schedule for conducting, reviewing, and reporting audits of the collection activities to verify compliance with elements of the Quality Management Program and operational policies and procedures.

C4.7.1 Audits shall be conducted on a regular basis by an individual with sufficient expertise to identify problems, but who is not solely responsible for the process being audited.

C4.7.2 The results of audits shall be used to recognize problems, detect trends, identify improvement opportunities, implement corrective and preventive actions when necessary, and follow up on the effectiveness of these actions in a timely manner.

C4.7.3 Audits shall include, at a minimum:

C4.7.3.1 Documentation of proper donor eligibility determination prior to start of the collection procedure.

C4.7.3.2 Documentation that external facilities performing critical contracted services have met the requirements of the written agreements.

C4.8 The Quality Management Plan shall include, or summarize and reference, policies and procedures on the management of cellular therapy products with positive microbial culture results that address at a minimum:

C4.8.1 Notification of the recipient’s physician.

C4.8.2 Investigation of cause.

C4.8.3 Follow-up of the donor, if relevant.
C4.9 The Quality Management Plan shall include, or summarize and reference, policies and procedures for errors, accidents, severe adverse events, biological product deviations, and complaints, including the following activities at a minimum:

C4.9.1 Detection.

C4.9.1.1 There shall be a defined process improvement plan that includes policies or procedures for the recognition of all issues that require corrective action.

C4.9.1.2 Record reviews shall identify deviations from policy or procedure and from specified acceptance or release criteria.

C4.9.2 Investigation.

C4.9.2.1 The collection staff shall conduct a thorough investigation in collaboration with the Clinical Program and Processing Facility as appropriate.

C4.9.2.2 Investigations shall include a description of the event, the involved individuals and/or cellular therapy products, when the event occurred, when and to whom the event was reported, and the immediate actions taken.

C4.9.2.3 Investigations shall identify the root cause and plan for short- and long-term corrective actions as warranted.

C4.9.2.4 There shall be a system to notify the Medical Director of any event requiring investigation at the time the investigation is initiated.

C4.9.3 Documentation.

C4.9.3.1 Cumulative files of errors, accidents, biological product deviations, serious adverse events, and complaints shall be maintained.

C4.9.3.2 Cumulative files shall include written investigation reports containing conclusions, follow-up, and corrective actions, that where applicable are linked to the record(s) of the involved cellular therapy products.
C4.9.3.3 After completion, all investigation reports shall be reviewed in a timely manner by the Medical Director or designee and quality management.

C4.9.4 Reporting.

C4.9.4.1 When it is determined that the cellular therapy product was responsible for an adverse reaction, the reaction and results of the investigation shall be reported to the recipient’s physician, other facilities participating in the manufacturing of the cellular therapy product, registries, and governmental agencies as required by Applicable Law or these Standards.

C4.9.4.2 Errors, accidents, biological product deviations, and complaints shall be reported to other facilities performing cellular therapy product functions on the affected cellular therapy product and to the appropriate regulatory and accrediting agencies, registries, grant agencies, and IRBs or Ethics Committees as necessary.

C4.9.5 Corrective and preventive action.

C4.9.6.1 Corrective action shall be implemented and documented as indicated, including both short-term action to address the immediate problem and long-term action to prevent the problem from recurring.

C4.9.6.2 Follow-up audits of the effectiveness of corrective actions shall be performed in a timeframe as indicated in the investigative report.

C4.9.6 Documentation of each adverse event that occurs as a result of collection activities shall be reviewed in a timely manner by the Medical Director.

C4.9.8 A written description of the adverse event shall be made available to the donor’s physician, the recipient’s physician, and the Processing Facility, if appropriate.

C4.9.9 Deviations from Standard Operating Procedures shall be documented.

C4.9.9.1 Unplanned deviations and associated corrective and preventive actions shall be reviewed by the Medical Director or designee.
C4.10  The Quality Management Plan shall include, or summarize and reference, policies and procedures for cellular therapy product tracking and tracing that allow tracking from the donor to the recipient or final disposition and tracing from the recipient or final disposition to the donor.

C4.11  The Quality Management Plan shall include, or summarize and reference, policies and procedures for actions to take in the event collection operations are interrupted.

C4.12  The Quality Management Plan shall include, or summarize and reference, policies and procedures for qualification of critical reagents, supplies, equipment, and facilities.

C4.12.1  Qualification plans shall be reviewed and approved by the Medical Director or designee.

C4.13  The Quality Management Plan shall include, or summarize and reference, policies and procedures for validation and/or verification of critical procedures to achieve the expected end-points, including viability of cells and cellular therapy product characteristics.

C4.13.1  Critical procedures shall include at least the following: collection procedures, labeling, storage, and distribution.

C4.13.2  Each validation shall include:

  C4.13.2.1  A validation plan, including conditions to be validated.

  C4.13.2.2  Acceptance criteria.

  C4.13.2.3  Data collection.

  C4.13.2.4  Evaluation of data.

  C4.13.2.5  Summary of results.

  C4.13.2.6  Documentation of review and acceptance of the methodology by the QM Supervisor or designee.
C4.13.2.7 Review and approval by the Medical Director or designee of the validation results and conclusions.

C4.13.3 Changes to a process shall include evaluation of risk to confirm that they do not create an adverse impact anywhere in the operation and shall be validated or verified, as appropriate.

SECTION C5: POLICIES AND PROCEDURES

C5.1 Policies and/or procedures addressing critical aspects of operations and management in addition to those required in C4 shall be established and maintained. These documents shall include all elements required by these Standards and shall address at a minimum:

C5.1.1 Donor and recipient confidentiality.

C5.1.2 Donor consent.

C5.1.3 Donor screening, testing, eligibility determination, and management, including pediatric donors if applicable.

C5.1.4 Infection control, biosafety, and chemical and radiological safety.

C5.1.5 Hygiene and use of personal protective attire.

C5.1.6 Cellular therapy product collection.

C5.1.7 Prevention of mix-ups and cross-contamination.

C5.1.8 Labeling (including associated forms and samples).

C5.1.9 Cellular therapy product expiration dates.

C5.1.10 Cellular therapy product storage.

C5.1.11 Release and exceptional release.
C5.1.12 Transportation and shipping including methods and conditions to be used for distribution to external facilities.

C5.1.13 Critical reagent and supply management.

C5.1.14 Equipment operation, maintenance, and monitoring including corrective actions in the event of failure.

C5.1.15 Cleaning and sanitation procedures including identification of the individuals responsible for the activities.

C5.1.16 If appropriate, facility management.

C5.1.17 Disposal of medical and biohazard waste.

C5.1.18 Emergency and disaster plan, including the collection staff response.

C5.2 A Standard Operating Procedures Manual for collection activities shall be maintained, including a listing of all current Standard Operating Procedures with titles, identifiers, and versions.

C5.3 Standard Operating Procedures required in C5.1 shall be sufficiently detailed and unambiguous to allow qualified staff to follow and complete the procedures successfully. Each individual procedure shall include:

C5.3.1 A clearly written description of the objectives.

C5.3.2 A description of equipment and supplies used.

C5.3.3 Acceptable end-points and the range of expected results.

C5.3.4 A stepwise description of the procedure.

C5.3.5 Reference to other Standard Operating Procedures or policies required to perform the procedure.

C5.3.6 A reference section listing appropriate literature.
C5.3.7 Documented approval of each procedure by the Medical Director prior to implementation and every two years thereafter.

C5.3.8 Documented approval of each procedural modification by the Medical Director or designee prior to implementation.

C5.3.9 A current version of orders, worksheets, reports, labels, and forms.

C5.4 Standard Operating Procedures relevant to processes being performed shall be readily available to the facility staff.

C5.5 All personnel shall follow the Standard Operating Procedures related to their positions.

C5.6 Variances shall be pre-approved by the Medical Director and quality management as appropriate.

C5.7 Review and/or training by a staff member shall be documented before the staff member is allowed to perform new and revised policies and procedures.

C5.8 There shall be a process to address age-specific issues in the Standard Operating Procedures.

SECTION C6: ALLOGENEIC AND AUTOLOGOUS DONOR EVALUATION AND MANAGEMENT

C6.1 There shall be written criteria for allogeneic and autologous donor evaluation and management by trained medical personnel.

C6.2 ALLOGENEIC AND AUTOLOGOUS DONOR INFORMATION AND CONSENT FOR COLLECTION

C6.2.1 The collection procedure shall be explained in terms the donor can understand, and shall include the following information at a minimum:

C6.2.1.1 The risks and benefits of the procedure.

C6.2.1.2 Tests and procedures performed on the donor to protect the health of the donor and the recipient.
C6.2.1.3 The rights of the donor and legally authorized representative of the donor who is a minor to review the results of such tests according to applicable laws and regulations.

C6.2.1.4 Protection of medical information and confidentiality.

C6.2.2 The donor shall have an opportunity to ask questions.

C6.2.3 The donor shall have the right to refuse to donate.

C6.2.3.1 The allogeneic donor shall be informed of the potential consequences to recipient of such refusal.

C6.2.4 Donor informed consent for the cellular therapy product collection shall be obtained and documented by a licensed health care professional familiar with the collection procedure.

C6.2.4.1 Informed consent from the allogeneic donor shall be obtained by a licensed health care professional other than the intended recipient’s primary physician.

C6.2.5 In the case of a donor who is a minor, informed consent shall be obtained from the donor’s legally authorized representative in accordance with applicable laws and regulations and shall be documented.

C6.2.6 The allogeneic donor shall give informed consent and authorization prior to release of the donor’s health information to the recipient’s physician and/or the recipient as appropriate.

C6.2.7 Documentation of consent shall be available to the collection staff prior to the collection procedure.

C6.3 ALLOGENEIC AND AUTOLOGOUS DONOR SUITABILITY FOR CELLULAR THERAPY PRODUCT COLLECTION

C6.3.1 There shall be criteria and evaluation policies and procedures in place to protect the safety of donors during the process of cellular therapy product collection.
C6.3.1.1 The collection staff shall confirm that any abnormal findings are reported to the prospective donor with documentation in the donor record of recommendations made for follow-up care.

C6.3.1.2 Allogeneic donor suitability shall be evaluated by a licensed health care professional who is not the health care professional overseeing care of the recipient.

C6.3.1.3 Autologous donors shall be tested as required by applicable laws and regulations.

C6.3.2 The risks of the cellular therapy product collection procedure shall be evaluated and documented.

C6.3.3 Pregnancy testing and counseling shall be performed for all female donors with childbearing potential within seven (7) days prior to cellular therapy product collection and preparation of the recipient for administration.

C6.3.4 Laboratory testing of all donors shall be performed by a laboratory that is accredited, registered, or licensed in accordance with applicable laws and regulations.

C6.3.5 Allogeneic donor infectious disease testing shall be performed using one or more screening tests approved or cleared by the governmental authority.

C6.3.6 The Clinical Program shall inform collection and processing staff of donor test results or if any testing was not performed.

C6.3.7 A donor advocate shall be available to represent allogeneic donors who are minors or who are mentally incapacitated.

C6.3.8 There shall be written documentation of issues of donor health that pertain to the safety of the collection procedure available to the collection staff. Collection staff shall document review of these issues prior to collection.

C6.3.9 There shall be a policy for follow-up of donors that includes routine management and the management of collection-associated adverse events.

C6.4 ADDITIONAL REQUIREMENTS FOR ALLOGENEIC DONORS

FACT Common Standards
DRAFT
C6.4.1 For allogeneic products containing red blood cells sufficient to cause a transfusion reaction, donors and recipients shall be tested for ABO group and Rh type using two independently collected samples. Discrepancies shall be resolved and documented prior to issue of the cellular therapy product.

C6.4.2 Collection staff shall comply with B6.1.19 through B6.1.20 when primarily responsible for donor screening for transmissible disease.

C6.4.3 Collection staff shall comply with B6.1.21 through B6.1.25 when primarily responsible for infectious disease testing of donors.

C6.4.4 Collection staff shall comply with B6.1.26 when primarily responsible for testing for the selection of allogeneic donors.

C6.4.5 Collection staff shall confirm that allogeneic donor eligibility, as defined by applicable laws and regulations, is determined by a physician after history, exam, medical record review, and testing before collection.

C6.4.6 Records required for donor eligibility determination shall be in English or translated into English when crossing international borders.

C6.4.7 Collection of a cellular therapy product from an ineligible allogeneic donor shall require documentation of urgent medical need that includes the rationale for the selection and documentation of the informed consent of the donor and the recipient.

C6.4.8 Allogeneic donor eligibility shall be communicated in writing to the Processing Facility.

C6.5 There shall be a policy covering the creation, regular review, and retention of donor records including at a minimum:

C6.5.1 Donor identification including at least name and date of birth.

C6.5.2 Age, gender, and medical history, and, for allogeneic donors, behavioral history.

C6.5.3 Consent to donate.

C6.5.4 Results of laboratory testing.
C6.5.5 Allogeneic donor eligibility determination, including the name of the responsible person who made the determination and the date of the determination.

SECTION C7: CODING AND LABELING OF CELLULAR THERAPY PRODUCTS

C7.1 LABELING OPERATIONS

C7.1.1 Labeling operations shall be conducted in a manner adequate to prevent mislabeling or misidentification of cellular therapy products, product samples, and associated records.

C7.1.1.1 Stocks of unused labels representing different products shall be stored in a controlled manner to prevent errors.

C7.1.1.2 Obsolete labels shall be destroyed.

C7.1.2 The labeling operation for pre-printed labels shall include, at a minimum, the following controls:

C7.1.2.1 Labels shall be held upon receipt from the manufacturer pending review and proofing against a copy or template approved by the Medical Director or designee to confirm accuracy regarding identity, content, and conformity.

C7.1.3 Print-on-demand label systems shall be validated to confirm accuracy regarding identity, content, and conformity of labels to templates approved by the Medical Director or designee.

C7.1.4 A system for label version control shall be employed.

C7.1.4.1 Representative obsolete labels shall be archived for ten (10) years after the last cellular therapy product was distributed with inclusive dates of use or as defined by applicable laws and regulations, whichever is longer.

C7.1.5 A system of checks in labeling procedures shall be used to prevent errors in transferring information to labels.
C7.1.5.1 Cellular therapy products that are subsequently re-packaged into new containers shall be labeled with new labels before they are detached from the original container.

C7.1.5.2 A controlled labeling procedure consistent with applicable law shall be defined and followed if container label information is transmitted electronically during a labeling process. This procedure shall include a verification step.

C7.1.6 When the label has been affixed to the container, a sufficient area of the container shall remain uncovered to permit inspection of the contents.

C7.1.7 The information entered on a container label shall be verified by one (1) qualified person using a validated process to verify the information or two (2) qualified people.

C7.1.8 Labeling elements required by applicable laws and regulations shall be present.

C7.1.9 All data fields on labels shall be completed.

C7.1.10 All labeling shall be clear, legible, and complete using ink that is indelible to all relevant agents.

C7.1.11 Labels affixed directly to a cellular therapy product bag shall be applied using appropriate materials as defined by the applicable regulatory authority.

C7.1.12 The label shall be validated as reliable for storage under the conditions in use.

C7.2 PRODUCT IDENTIFICATION

C7.2.1 Each cellular therapy product collection shall be assigned a unique numeric or alphanumeric identifier by which it will be possible to trace any cellular therapy product to its donor and to all records describing the handling and final disposition of the product.

C7.2.1.1 The cellular therapy product, donor samples, and product samples shall be labeled with the same identifier.
C7.2.1.2 If a single cellular therapy product is stored in more than one container, there shall be a system to identify each container.

C7.2.1.3 Supplementary identifiers shall not obscure the original identifier.

C7.2.1.3 The facility associated with each identifier shall be noted on the label.

C7.2.2 Cellular therapy products shall be identified according to the proper name of the product, including appropriate attributes, as defined in ISBT 128 Standard Terminology for Blood, Cellular Therapy, and Tissue Product Descriptions.

C7.3 LABEL CONTENT

C7.3.1 At the end of the cellular therapy product collection, the cellular therapy product label on the primary product container and concurrent plasma container shall bear the information in the Cellular Therapy Product Labeling table in Appendix I.

C7.3.2 Labeling at the end of collection shall occur before the cellular therapy product bag is disconnected from the donor.

C7.3.3 Allogeneic cellular therapy products collected in or designated for use in the U.S. shall be accompanied by the elements listed in the Accompanying Documents at Distribution table in Appendix III at the time of distribution.

C7.3.4 For allogeneic cellular therapy products distributed before completion of donor eligibility determination, there shall be documentation that donor eligibility determination was completed during or after the use of the product.

SECTION C8: PROCESS CONTROLS

C8.1 Collection of cellular therapy products shall be performed according to written procedures.

C8.2 There shall be a process for inventory control that encompasses equipment, reagents, supplies, and labels.

C8.2.1 There shall be a system to uniquely identify and track and trace all critical equipment, reagents, supplies, and labels used in the collection of cellular therapy products.
C8.2.2 Each supply and reagent used to collect cellular therapy products shall be visually examined at receipt and prior to use for damage or evidence of contamination.

C8.2.3 Supplies and reagents coming into contact with cellular therapy products during collection shall be sterile and of the appropriate grade for the intended use.

C8.3 Equipment for the collection procedure shall conform to applicable laws and regulations, where applicable.

C8.4 There shall be written documentation of an assessment of donor suitability for the collection procedure performed by a qualified person immediately prior to each collection procedure.

C8.5 Collection procedures shall include a process for assessing the quality of cellular therapy products to confirm product safety, viability, and integrity and to document that products meet predetermined release specifications. Results of all such assessments shall become part of the permanent record of the product collected.

C8.5.1 Methods for collection shall include a process for controlling and monitoring the collection of cellular therapy products to confirm products meet predetermined release specifications.

C8.5.2 Methods for collection shall employ procedures validated to result in acceptable cell viability and recovery.

C8.6 Collection methods shall employ aseptic technique so that cellular therapy products do not become contaminated during collection.

C8.7 Collection methods for pediatric donors shall employ appropriate age and size adjustments to the procedures when required.

C8.8 Cellular therapy products shall be packaged in closed sterile containers appropriate for the product collected.

C8.9 Marrow products shall be filtered to remove particulate material prior to final packaging, distribution, or administration using filters that are non-reactive with blood.

C8.10 Records shall be made concurrently with each step of collection of each cellular therapy product in such a way that all steps may be accurately traced.
C8.10.1 Records shall identify the person immediately responsible for each significant step, including dates and times of various steps, where appropriate.

SECTION C9: CELLULAR THERAPY PRODUCT STORAGE

C9.1 Cellular therapy products stored before distribution shall be stored in a manner to prevent mix-ups, deterioration, contamination, cross-contamination, and improper release or distribution of products.

C9.2 Collection procedures or policies shall include the duration and conditions of short-term storage prior to distribution to a Processing Facility or Clinical Program.

SECTION C10: CELLULAR THERAPY PRODUCT TRANSPORTATION AND SHIPPING

C10.1 Procedures for transportation and shipping of the cellular therapy product shall be designed to protect the integrity of the product and the health and safety of individuals in the immediate area.

C10.2 The primary cellular therapy product container shall be placed in a secondary container that is sealed to prevent leakage.

C10.3 The cellular therapy product shall be transported and/or shipped to the Processing Facility at a temperature defined in the transportation and shipping procedure.

C10.3.1 Cellular therapy products that are transported and/or shipped from the collection site to the Processing Facility shall be transported and/or shipped in an outer container made of material adequate to withstand leakage of contents, impact shocks, pressure changes, temperature changes, puncture, and other conditions incident to ordinary handling.

C10.3.2 The cellular therapy product shall be transported by a qualified courier to the Processing Facility.

C10.4 The cellular therapy product shall be transported and/or shipped with required accompanying records as defined in the transportation and shipping procedure and in compliance with C7.3.3 and C7.3.4.

C10.5 There shall be a record of the date and time of cellular therapy product distribution.
SECTION C11: RECORDS

C11.1 GENERAL REQUIREMENTS

C11.1.1 A records management system shall be established and maintained to facilitate the review of records.

C11.1.1.1 The records management system shall facilitate tracking of the cellular therapy product from the donor to the recipient or final disposition and tracing from the recipient or final disposition to the donor.

C11.1.1.2 For cellular therapy products that are to be distributed for use at another institution, the receiving institution shall be informed of the tracking system and requirement for tracking the product in writing or electronic format at or before the time of product distribution.

C11.1.2 Records shall be maintained in such a way as to preserve their integrity.

C11.1.3 If records are maintained in more than one location, there shall be a system to allow prompt identification, location, and retrieval of all records.

C11.1.4 Records shall be accurate, legible, and indelible.

C11.1.5 All records and communications between the collection, processing, and clinical facilities, and their recipients and donors, shall be regarded as privileged and confidential.

C11.1.5.1 Safeguards to assure this confidentiality shall be established and followed in compliance with applicable laws and regulations.

C11.1.6 Records shall be maintained in one or more forms that are retrievable.

C11.2 Collection records related to quality control, personnel training and competency, facility maintenance, facility management, complaints, or other general facility issues shall be retained for a minimum of ten (10) years, or longer in accordance with applicable laws and regulations, or a defined program or institution policy.

C11.2.1 Employee records shall be maintained in a confidential manner, as required by applicable laws and regulations.
C11.2.2 The Collection Facility shall maintain records of identification codes of personnel including methods to link the name and/or signature to the initials or other identification codes used in other documents and records. These records shall include dates of employment.

C11.3 Records to allow tracking and tracing of cellular therapy products shall be maintained for a minimum of ten (10) years after final distribution of the product, or as required by applicable laws and regulations. These records shall include at a minimum: product identity, unique numeric or alphanumeric identifier, and collection date and time; and donor and recipient identification as far as known.

C11.4 Patient and donor records including, but not limited to, consents and records of care shall be maintained in a confidential manner as required by applicable laws and regulations for a minimum of ten (10) years after the administration of the cellular therapy product, or, if not known, ten (10) years after the date of the distribution, disposition, or expiration of the product, whichever requires the longest maintenance period.

C11.5 Research records shall be maintained in a confidential manner as required by applicable laws and regulations for a minimum of ten (10) years after the administration, distribution, disposition, or expiration of the cellular therapy product, whichever is latest.

C11.6 ELECTRONIC RECORDS

C11.6.1 The Collection Facility shall establish and maintain a current listing of all critical electronic record systems. Critical electronic record systems shall include at a minimum systems under the control of the Collection Facility that are used:

C11.6.1.1 As a substitute for paper.

C11.6.1.2 To make decisions.

C11.6.1.3 To perform calculations.

C11.6.1.4 To create and/or store information used in critical procedures.

C11.6.2 For all critical electronic record systems, there shall be policies, procedures, and system elements to maintain the accuracy, integrity, identity, and confidentiality of all records.
C11.6.3 There shall be a means by which access to electronic records is limited to authorized individuals.

C11.6.4 The critical electronic record system shall maintain unique donor, cellular therapy product, and recipient identifiers.

C11.6.5 There shall be protection of the records to enable their accurate and ready retrieval throughout the period of record retention.

C11.6.6 For all critical electronic record systems, there shall be an alternative system for all electronic records that maintains continuous operation in the event that critical electronic record systems are not available. The alternative system shall be validated and collection staff shall be trained in its use.

C11.6.7 For all critical electronic record systems, there shall be written procedures for record entry, verification, and revision.

  C11.6.7.1 A method shall be established or the system shall provide for review of data before final acceptance.

  C11.6.7.2 A method shall be established or the system shall provide for the unambiguous identification of the individual responsible for each record entry.

C11.6.8 For all critical electronic record systems, there shall be the ability to generate true copies of the records in both human readable and electronic format suitable for inspection and review.

C11.6.9 For all critical electronic record systems, there shall be validated procedures for and documentation of:

  C11.6.9.1 Training and continued competency of personnel in the use of the system.

  C11.6.9.2 Monitoring of data integrity.

  C11.6.9.3 Back-up of the electronic records system on a regular schedule.

  C11.6.9.4 System assignment of unique identifiers for donors, cellular therapy products, or recipients.
C11.7 RECORDS IN CASE OF DIVIDED RESPONSIBILITY

C11.7.1 The collection staff shall furnish to the facility of final disposition a copy of all records relating to the collection procedures performed in so far as they concern the safety, purity, or potency of the cellular therapy product involved.

C11.7.2 If two (2) or more facilities participate in the collection, processing, or administration of the cellular therapy product, the records of each facility shall show plainly the extent of its responsibility.
PROCESSING FACILITY STANDARDS

PART D

D1 General
D2 Processing Facility
D3 Personnel
D4 Quality Management
D5 Policies and Procedures
D6 Equipment, Supplies, and Reagents
D7 Coding and Labeling of Cellular Therapy Products
D8 Process Controls
D9 Storage
D10 Transportation and Shipping
D11 Distribution and Receipt
D12 Disposal
D13 Records
PART D: PROCESSING FACILITY STANDARDS

SECTION D1: GENERAL

D1.1 These Standards apply to all processing, storage, and distribution activities performed in the Processing Facility on cellular therapy products obtained from living donors.

D1.2 The Processing Facility shall abide by all applicable laws and regulations.

D1.2.1 The Processing Facility shall be licensed, registered, or accredited with the appropriate governmental authorities for the activities performed.

D1.3 The Processing Facility shall have a Processing Facility Director, a Processing Facility Medical Director, and at least one designated staff member actively performing cellular therapy product processing. This team shall have been in place for at least twelve (12) months preceding initial accreditation.

SECTION D2: PROCESSING FACILITY

D2.1 The Processing Facility shall be of adequate space, design, and location for the intended procedures.

D2.1.1 The Processing Facility shall provide adequate lighting, ventilation, and access to sinks, to prevent the introduction, transmission, or spread of communicable disease.

D2.1.2 The Processing Facility shall be secure to prevent the entrance of unauthorized personnel.

D2.1.3 The Processing Facility shall be divided into defined areas of adequate size to prevent improper labeling, mix-ups, contamination, or cross-contamination of cellular therapy products.

D2.1.4 There shall be a process to control storage areas to prevent mix-ups, contamination, and cross-contamination of all cellular therapy products prior to release or distribution.
D2.2 Critical facility parameters that may affect processing, storage, or distribution, including temperature and humidity at a minimum, shall be assessed for risk to the cellular therapy product.

D2.2.1 Parameters identified to be a risk to the cellular therapy product must be controlled, monitored, and recorded.

D2.3 When using procedures that may result in contamination or cross-contamination of cellular therapy products or when performing more than minimal manipulation, critical environmental conditions shall be controlled, monitored, and recorded where appropriate, for air quality and surface contaminates.

D2.3.1 The Processing Facility shall qualify environmental control systems and validate cleaning and sanitation procedures appropriate for the environmental classification and degree of manipulation performed.

D2.4 The Processing Facility shall be maintained in a clean, sanitary, and orderly manner.

D2.4.1 There shall be documentation of facility cleaning and sanitation to achieve adequate conditions for operations.

D2.4.2 There should be a policy for selection of cleaning agents and disinfectants.

D2.4.3 Cleaning agents and disinfectants used in areas where the cellular therapy products are handled should be alternated.

D2.4.4 Surface microbial monitoring in areas where the cellular therapy product is handled should be performed.

D2.4.5 There shall be adequate equipment and materials for the procedures performed.

D2.5 The Processing Facility shall be operated in a manner designed to minimize risks to the health and safety of employees, patients, donors, visitors, and volunteers.

D2.6 The Processing Facility shall have a written safety manual that includes instructions for action in case of exposure to liquid nitrogen; communicable disease; and chemical, biological, or radiological hazards.
D2.7 All waste generated by the Processing Facility activities shall be disposed of in a manner that minimizes any hazard to facility personnel and to the environment in accordance with applicable laws and regulations.

D2.8 Gloves and protective clothing shall be worn while handling biological specimens. Such protective clothing shall not be worn outside the work area.

SECTION D3: PERSONNEL

D3.1 PROCESSING FACILITY DIRECTOR

D3.1.1 There shall be a Processing Facility Director with a medical degree or doctoral degree in a relevant science, qualified by a minimum of two (2) years training and experience for the scope of activities carried out in the Processing Facility.

D3.1.2 The Processing Facility Director shall be responsible for all procedures, administrative operations, and the Quality Management Program of the Processing Facility, including compliance with these Standards and other applicable laws and regulations.

D3.1.3 The Processing Facility Director shall participate in ten (10) hours of educational activities related to cellular therapy product processing.

D3.2 PROCESSING FACILITY MEDICAL DIRECTOR

D3.2.1 There shall be a Processing Facility Medical Director who is a licensed or certified physician with a minimum of two (2) years postgraduate training and practical and relevant experience in the preparation and clinical use of cellular therapy products.

D3.2.2 The Processing Facility Medical Director or designee shall be directly responsible for all medical aspects related to the Processing Facility, including consultations with the Clinical Program regarding processing to be performed.

D3.2.3 The Processing Facility Medical Director shall participate in ten (10) hours of educational activities related to cellular therapy product processing.

D3.3 QUALITY MANAGEMENT SUPERVISOR
D3.3.1 There shall be a Processing Facility Quality Management Supervisor to establish and maintain systems to review, modify, and approve all policies and procedures intended to monitor compliance with these Standards and/or the performance of the Processing Facility.

D3.3.2 The Processing Facility Quality Management Supervisor shall participate in five (5) hours of educational activities related to cellular therapy processing and/or quality management.

D3.4 STAFF

D3.4.1 There shall be adequate numbers of trained staff for the volume and complexity of all operations.

D3.4.2 If the Processing Facility has only one designated staff member qualified to perform cellular therapy product processing, there shall be other qualified individual(s) to serve as back-up as needed to maintain sufficient coverage.

SECTION D4: QUALITY MANAGEMENT

D4.1 The Processing Facility shall establish and maintain a written Quality Management Plan.

D4.2 The Quality Management Plan shall include, or summarize and reference, an organizational chart of key positions and functions within the Processing Facility.

D4.2.1 The Quality Management Plan shall include a description of how these key positions interact to implement the quality management activities.

D4.2.2 The Processing Facility Director or designee shall be responsible for the Quality Management Plan as it pertains to the Processing Facility.

D4.2.3 The Processing Facility Director or designee shall have authority over and responsibility for ensuring that the Quality Management Program is effectively established and maintained.

D4.2.4 The Processing Facility Director or designee shall not have oversight of his/her own work if this person also performs other tasks in the Processing Facility.
D4.2.5 The Processing Facility Director or designee shall report on quality management activities, at a minimum, quarterly.

D4.2.6 The Processing Facility Director or designee shall annually review the effectiveness of the Quality Management Program. This report shall be provided to the Clinical Program Director, as applicable.

D4.3 The Quality Management Plan shall include, or summarize and reference, policies and procedures for each key position in the Processing Facility. Personnel requirements shall include at a minimum:

D4.3.1 A current job description for all staff.

D4.3.2 A system to document the following for all staff:

D4.3.2.1 Initial qualifications.

D4.3.2.2 New employee orientation.

D4.3.2.3 Initial training, and retraining when appropriate, for all procedures performed.

D4.3.2.4 Competency for each critical function performed.

D4.3.2.5 Continued competency at least annually.

D4.3.2.6 Continuing education.

D4.3.3 A description of minimal trainer qualifications, including level of experience and education, and a uniform plan for staff training.

D4.4 The Quality Management Plan shall include, or summarize and reference, policies and procedures for development, approval, validation, implementation, review, revision, and archival of all critical documents.

D4.4.1 There shall be a current listing of all active critical documents that shall comply with the document control system requirements. Controlled documents shall include at a minimum:
D4.4.1.1 Policies and Standard Operating Procedures.

D4.4.1.2 Worksheets.

D4.4.1.3 Forms.

D4.4.1.4 Labels.

D4.4.2 The document control policy shall include:

D4.4.2.1 A standardized format for policies, procedures, worksheets, forms, and labels.

D4.4.2.2 Assignment of a numeric or alphanumerical identifier and title to each document and document version regulated within the system.

D4.4.2.3 A procedure for document approval, including the approval date, signature of approving individual(s), and the effective date.

D4.4.2.4 A system to protect controlled documents from accidental or unauthorized modification.

D4.4.2.5 A system for document change control that includes a description of the change, the signature of approving individual(s), approval date(s), effective date, and archival date.

D4.4.2.6 A procedure for preparation, approval, implementation, review, revision, and archival of all policies and procedures.

D4.4.2.7 Archived policies and procedures, the inclusive dates of use, and their historical sequence shall be maintained for a minimum of ten (10) years from archival or according to governmental or institutional policy, whichever is longer.

D4.4.2.8 A system for the retraction of obsolete documents to prevent unintended use.
D4.5 The Quality Management Plan shall include, or summarize and reference, policies and procedures for establishment and maintenance of written agreements with third parties whose services impact the cellular therapy product.

D4.5.1 Agreements shall include the responsibility of the facility performing any step in processing, testing, or storage to comply with applicable laws and regulations and these Standards.

D4.5.2 Agreements shall be dated and reviewed on a regular basis.

D4.6 The Quality Management Plan shall include, or summarize and reference, policies and procedures for documentation and review of cellular therapy product efficacy and/or outcome analysis to verify that the procedures in use consistently provide a safe and effective product.

D4.6.1 Criteria for cellular therapy product safety, product efficacy, and/or the clinical outcome, shall be determined and shall be reviewed at regular time intervals.

D4.6.2 Both individual cellular therapy product data and aggregate data shall be evaluated.

D4.7 The Quality Management Plan shall include, or summarize and reference, policies, procedures, and a schedule for conducting, reviewing, and reporting audits of the Processing Facility’s activities to verify compliance with elements of the Quality Management Program and operational policies and procedures.

D4.7.1 Audits shall be conducted on a regular basis by an individual with sufficient expertise to identify problems, but who is not solely responsible for the process being audited.

D4.7.2 The results of audits shall be used to recognize problems, detect trends, identify improvement opportunities, and implement corrective and preventative actions when necessary, and follow-up on the effectiveness of these actions in a timely manner.

D4.7.3 Audits shall include documentation that external facilities performing critical contracted services have met the requirements of the written agreements.

D4.8 The Quality Management Plan shall include, or summarize and reference, policies and procedures on the management of cellular therapy products with positive microbial culture results that address at a minimum:
D4.8.1 Documentation and product labeling.

D4.8.2 Product quarantine.

D4.8.3 Release of the product, including identification of authorized individuals and criteria for product release.

D4.8.4 Investigation of cause.

D4.8.5 Notification of the recipient’s physician, collection facility, and/or any other facility in receipt of the cellular therapy product.

D4.8.6 Reporting to regulatory agencies if appropriate.

D4.9 The Quality Management Plan shall include, or summarize and reference, policies and procedures for errors, accidents, biological product deviations, severe adverse events, and complaints, including the following activities at a minimum:

D4.9.1 Detection.

D4.9.1.1 There shall be a defined process improvement plan that includes policies or procedures for the recognition of all issues that require corrective action.

D4.9.1.2 Record reviews shall identify deviations from policy or procedure and from specified acceptance or release criteria.

D4.9.2 Investigation.

D4.9.2.1 The Processing Facility shall conduct a thorough investigation in collaboration with the Clinical Program and collection staff as appropriate.

D4.9.2.2 Investigations shall include a description of the event, the involved individuals and/or cellular therapy products, when the event occurred, when and to whom the event was reported, and the immediate actions taken.

D4.9.2.3 Investigations shall identify the root cause and plan for short- and long-term corrective actions as warranted.
D4.9.2.4 There shall be a system to notify the Processing Facility Director and/or Medical Director of any event requiring investigation at the time the investigation is initiated.

D4.9.3 Documentation.

D4.9.3.1 Cumulative files of errors, accidents, biological product deviations, adverse events, and complaints shall be maintained.

D4.9.3.2 Cumulative files shall include written investigation reports containing conclusions, follow-up, and corrective actions, that where applicable are linked to the record(s) of the involved cellular therapy products.

D4.9.3.3 After completion all investigation reports shall be reviewed in a timely fashion by the Processing Facility Director or designee, Quality Management, and the Processing Facility Medical Director if warranted.

D4.9.4 Reporting.

D4.9.4.1 When it is determined that the cellular therapy product was responsible for an adverse reaction, the reaction and results of the investigation shall be reported to the recipient’s physician, other facilities participating in the manufacturing of the cellular therapy product, registries, and governmental agencies as required by Applicable Law or these Standards.

D4.9.4.2 Errors, accidents, biological product deviations, and complaints shall be reported to other facilities performing cellular therapy product functions on the affected cellular therapy product and to the appropriate regulatory and accrediting agencies, registries, grant agencies, and IRBs or Ethics Committees as necessary.

D4.9.5 Corrective and preventive action.

D4.9.5.1 Corrective action shall be implemented and documented as indicated, including both short-term action to address the immediate problem and long-term action to prevent the problem from recurring.

D4.9.5.2 Follow-up audits of the effectiveness of corrective actions shall be performed in a timeframe as indicated in the investigative report.
D4.9.6 Documentation of each adverse event that occurs in the Processing Facility shall be reviewed in a timely manner by the Processing Facility Director and Processing Facility Medical Director, if appropriate.

D4.9.7 A written description of the adverse event shall be made available to the recipient’s and/or donor’s physician and the Clinical Program, if appropriate.

D4.9.8 When applicable, adverse events shall be reported to the appropriate regulatory agencies within the required timeframes.

D4.9.9 Deviations from Standard Operating Procedures shall be documented.

D4.9.9.1 Unplanned deviations and associated corrective actions shall be reviewed by the Processing Facility Director or designee.

D4.9.10 There shall be a defined process to obtain feedback from patients or legally authorized representatives.

D4.10 The Quality Management Plan shall include, or summarize and reference, policies and procedures for cellular therapy product tracking and tracing that allows tracking from the donor to the recipient or final disposition and tracing from the recipient or final disposition to the donor.

D4.11 The Quality Management Plan shall include, or summarize and reference, policies and procedures for actions to take in the event the Processing Facility’s operations are interrupted.

D4.12 The Quality Management Plan shall include, or summarize and reference, policies and procedures for qualification of critical supplies, vendors, reagents, equipment, and facilities.

D4.12.1 Qualification plans shall be reviewed and approved by the Processing Facility Director or designee.

D4.12.2 Vendors of critical supplies, reagents, services, and equipment shall be qualified by a method that confirms they are compliant with applicable laws and regulations and these Standards.

D4.12.3 Reagents that are not the appropriate grade shall undergo qualification for the intended use.
D4.12.4 External facilities to which the Processing Facility distributes cellular therapy products shall be qualified for suitability to distribute and administer cellular therapy products in accordance with applicable laws and regulations.

D4.13 The Quality Management Plan shall include, or summarize and reference, policies and procedures for validation and/or verification of critical procedures to achieve the expected end-points, including viability of cells and cellular therapy product characteristics.

D4.13.1 Critical procedures to be validated or verified shall include at least the following: processing techniques, cryopreservation procedures, labeling, storage, and distribution.

D4.13.2 Procedures for manufacturing reagents in-house shall be validated.

D4.13.3 There shall be documentation of review and acceptance of validation studies by the appropriate individual from Quality Management. Each validation shall include:

D4.13.3.1 A validation plan, including conditions to be validated.

D4.13.3.2 Acceptance criteria.

D4.13.3.3 Data collection.

D4.13.3.4 Evaluation of data.

D4.13.3.5 Summary of results.

D4.13.3.6 Documentation of review and acceptance of the methodology by the QM Supervisor.

D4.13.3.7 Review and approval by the Processing Facility Director or designee of the validation results and conclusions.

D4.13.4 Changes to a process shall include evaluation of risk to confirm that they do not create an adverse impact anywhere in the operation and shall be validated or verified as appropriate.
SECTION D5: POLICIES AND PROCEDURES

D5.1 The Processing Facility shall establish and maintain policies and/or procedures addressing critical aspects of operations and management in addition to those required in D4. These documents shall include all elements required by these Standards and shall address at a minimum:

D5.1.1 Donor and recipient confidentiality.

D5.1.2 Cellular therapy product receipt.

D5.1.3 Infection control, biosafety, and chemical and radiological safety.

D5.1.4 Hygiene and use of personal protective attire.

D5.1.5 Processing and process control.

D5.1.6 Processing of ABO-incompatible cellular therapy products to include a description of the indication for and processing methods to be used for red cell and plasma depletion.

D5.1.7 Prevention of mix-ups and cross-contamination.

D5.1.8 Labeling (including associated forms and samples).

D5.1.9 Cryopreservation and thawing.

D5.1.10 Cellular therapy product expiration dates.

D5.1.11 Cellular therapy product storage to include alternative storage if the primary storage device fails.

D5.1.12 Release and exceptional release.

D5.1.13 Transportation and shipping, including methods and conditions within the Processing Facility and to and from external facilities.
D5.1.14 Cellular therapy product recall, to include a description of responsibilities and actions to be taken, and notification of appropriate regulatory agencies.

D5.1.15 Cellular therapy product disposal.

D5.1.16 Critical reagent and supply management.

D5.1.17 Equipment operation, maintenance, and monitoring, including corrective actions in the event of failure.

D5.1.18 Cleaning and sanitation procedures including identification of the individuals responsible for the activities.

D5.1.19 Environmental control to include a description of environmental monitoring plan.

D5.1.20 Facility management.

D5.1.21 Disposal of medical and biohazard waste.

D5.1.22 Emergency and disaster plan, including the Processing Facility response.

D5.2 The Processing Facility shall maintain a detailed Standard Operating Procedures Manual that includes a listing of all current Standard Operating Procedures, including title, identifier, and version.

D5.3 Standard Operating Procedures shall be sufficiently detailed and unambiguous to allow qualified staff to follow and complete the procedures successfully. Each individual procedure shall include:

D5.3.1 A clearly written description of the objectives.

D5.3.2 A description of equipment and supplies used.

D5.3.3 Acceptable end-points and the range of expected results.

D5.3.4 A stepwise description of the procedure.
D5.3.5 Reference to other Standard Operating Procedures or policies required to perform the procedure.

D5.3.6 A reference section listing appropriate literature.

D5.3.7 Documented approval of each procedure by the Processing Facility Director or Medical Director, as appropriate, prior to implementation and every two years thereafter.

D5.3.8 Documented approval of each procedural modification by the Processing Facility Director or Medical Director, as appropriate, prior to implementation.

D5.3.9 A current version of orders, worksheets, reports, labels, and forms.

D5.4 Standard Operating Procedures relevant to processes being performed shall be readily available to the Processing Facility staff.

D5.5 All personnel shall follow the Standard Operating Procedures related to their positions.

D5.6 Variances shall be pre-approved by the appropriate Processing Facility Director and/or Medical Director, and quality management as appropriate.

D5.7 Review and/or training by a staff member shall be documented before the staff member is allowed to perform new and revised policies and procedures.

SECTION D6: EQUIPMENT, SUPPLIES, AND REAGENTS

D6.1 Equipment, supplies, and reagents used to process cellular therapy products shall be used in a manner that maintains product function and integrity and prevents product mix-ups, contamination, and cross-contamination.

D6.2 Supplies and reagents used in processing, testing, cryopreservation, and storage shall be controlled by a materials management system that includes requirements for the following, at a minimum:

D6.2.1 Visual examination of each supply and reagent used to manufacture cellular therapy products for damage or evidence of contamination upon receipt and acceptance into inventory.
D6.2.2 Records of receipt that shall include the supply or reagent type, quantity, manufacturer, lot number, date of receipt, acceptability, and expiration date.

D6.2.3 Storage of materials under the appropriate environmental conditions in a secure, sanitary, and orderly manner to prevent mix up or unintended use.

D6.2.4 Use of supplies and reagents coming into contact with cellular therapy products during processing, storage, and/or administration that are sterile and of the appropriate grade for the intended use.

D6.2.5 Cleaning and sterilizing of non-disposable supplies or instruments using a procedure verified to remove infectious agents and other contaminants.

D6.2.6 Use of supplies and reagents in a manner consistent with manufacturer instructions.

D6.2.7 Process to prevent the use of expired reagents and supplies.

D6.3 There shall be a system to uniquely identify and track all critical equipment used in the processing of cellular therapy products. The system shall identify each cellular therapy product for which the equipment was used.

D6.4 Equipment used in cellular therapy product processing, testing, cryopreservation, storage, and distribution shall be maintained in a clean and orderly manner and located to facilitate cleaning, sanitation, calibration, and maintenance according to established schedules.

D6.5 The equipment shall be inspected for cleanliness prior to each use and verified to be in compliance with the maintenance schedule daily prior to use.

D6.6 The equipment shall be standardized and calibrated on a regularly scheduled basis and after a critical repair or move as described in Standard Operating Procedures and in accordance with the manufacturer’s recommendations.

D6.6.1 All equipment with a critical measuring function shall be calibrated against a traceable standard, if available. Where no traceable standard is available, the basis for calibration shall be described and documented.
D6.6.2 When equipment is found to be out of calibration or specification, there shall be a defined process for action required for cellular therapy products manufactured since the last calibration.

D6.7 There shall be a procedure that addresses the actions to take in the event of equipment malfunction or failure.

D6.8 Equipment shall conform to applicable laws and regulations.

D6.9 Lot numbers, expiration dates, and manufacturers of critical reagents and supplies and identification of key equipment used in each procedure shall be documented.

D6.10 The Processing Facility shall use an inventory control system to document the availability and identity of critical reagents and supplies. This shall include at a minimum:

D6.10.1 A system to uniquely identify and track all critical reagents and supplies used to manufacture cellular therapy products.

D6.10.2 A system to identify each cellular therapy product for which each critical reagent or supply was used.

D6.10.3 A system to maintain adequate stocks of reagents and supplies for the procedures to be performed.

SECTION D7: CODING AND LABELING OF CELLULAR THERAPY PRODUCTS

D7.1 LABELING OPERATIONS

D7.1.1 Labeling operations shall be conducted in a manner adequate to prevent mislabeling or misidentification of cellular therapy products and product samples and associated records.

D7.1.1.1 Stocks of unused labels representing different cellular therapy products shall be stored in a controlled manner to prevent errors.

D7.1.1.2 Obsolete labels shall be destroyed.
D7.1.2 The labeling operation for pre-printed labels shall include, at a minimum, the following controls:

D7.1.2.1 Labels shall be held upon receipt from the manufacturer pending review and proofing against a copy or template approved by the Processing Facility Director or designee to confirm accuracy regarding identity, content, and conformity.

D7.1.3 Print-on-demand label systems shall be validated to confirm accuracy regarding identity, content, and conformity of labels to templates approved by the Processing Facility Director or designee.

D7.1.4 A system for label version control shall be employed.

D7.1.4.1 Representative obsolete labels shall be archived minimally for ten (10) years after the last cellular therapy product was distributed with inclusive dates of use or as defined by applicable laws and regulations, whichever is longer.

D7.1.5 A system of checks in labeling procedures shall be used to prevent errors in transferring information to labels.

D7.1.5.1 Cellular therapy products that are subsequently re-packaged into new containers shall be labeled with new labels before they are detached from the original container.

D7.1.5.2 A controlled labeling procedure consistent with applicable law shall be defined and followed if container label information is transmitted electronically during a labeling process. This procedure shall include a verification step.

D7.1.6 When the label has been affixed to the container, a sufficient area of the container shall remain uncovered to permit inspection of the contents.

D7.1.7 The information entered on a container label shall be verified by one (1) qualified person using a validated process to verify the information or two (2) qualified people prior to distribution of the cellular therapy product.

D7.1.8 Labeling elements required by applicable laws and regulations, if any, shall be present.
### D7.1.9 All data fields on labels shall be completed.

### D7.1.10 All labeling shall be clear, legible, and completed using ink that is indelible to all relevant agents.

### D7.1.11 Labels affixed directly to a cellular therapy product bag shall be applied using appropriate materials as defined by the applicable regulatory authority.

### D7.1.12 The label shall be validated as reliable for storage under the conditions in use.

---

#### D7.2 PRODUCT IDENTIFICATION

**D7.2.1** Each cellular therapy product shall be assigned a unique numeric or alphanumeric identifier by which it will be possible to trace any product to its donor and to all records describing the handling and final disposition of the product.

- **D7.2.1.1** The cellular therapy product, concurrent plasma, product samples, and concurrently collected samples shall be labeled with the same identifier.

- **D7.2.1.2** If a single cellular collection product is stored in more than one container, there shall be a system to identify each container.

- **D7.2.1.3** If cellular therapy products from the same donor are pooled, the pool identifier shall allow tracing to the original products.

- **D7.2.1.4** Supplementary identifiers shall not obscure the original identifier.

- **D7.2.1.5** The facility associated with each identifier shall be noted on the label.

- **D7.2.1.6** If the original identifier is replaced, documentation shall link the new identifier to the original.

**D7.2.2** Cellular therapy products shall be identified according to the proper name of the product, including appropriate attributes, as defined in ISBT 128 Standard Terminology for Blood, Cellular Therapy, and Tissue Product Descriptions.

---

#### D7.3 LABEL CONTENT
D7.3.1 Each label shall bear the information required at completion of processing and at distribution in the Cellular Therapy Product Labeling table in Appendix I.

D7.3.2 Each label shall bear the appropriate biohazard and warning labels as found in the Circular of Information for the Use of Cellular Therapy Products, “Table 2. Biohazard and Warning Labels on Cellular Therapy Products Collected, Processed, and/or Administered in the United States.”

D7.3.3 Any container bearing a partial label shall be accompanied by the information required by the Cellular Therapy Product Labeling table in Appendix I. Such information shall be attached securely to the cellular therapy product on a tie tag or enclosed in a sealed package to accompany the product.

D7.3.4 The name and address of the facility that determines that the cellular therapy product meets release criteria and the name and address of the facility that makes the product available for distribution shall either appear on the product label or accompany the product at distribution.

D7.3.5 Cellular therapy products collected in or designated for use in the U.S. shall have the elements in the Accompanying Documents at Distribution table in Appendix III accompany the cellular therapy product when it leaves the Processing Facility.

D7.3.6 For cellular therapy products distributed before completion of donor eligibility determination, there shall be documentation that donor eligibility determination was completed during or after distribution of the cellular therapy product and that the physician using the product was informed of the results of that determination.

SECTION D8: PROCESS CONTROLS

D8.1 There shall be a process for controlling and monitoring the manufacturing of cellular therapy products so that products meet predetermined release specifications.

D8.1.1 The Processing Facility Director shall define tests and procedures for measuring and assaying cellular therapy products to assure their safety, viability, and integrity and to document that products meet predetermined release specifications. Results of all such tests and procedures shall become part of the permanent record of the product processed.

D8.1.2 There shall be a documented system for the identification and handling of test samples so that they are accurately related to the corresponding cellular therapy product, donor, or recipient.
D8.1.2.1 There shall be a mechanism to identify the individual obtaining the sample, the date, the time (if appropriate), and the sample source.

D8.1.2.2 Samples obtained for testing shall be representative of the cellular therapy product to be evaluated.

D8.1.3 There shall be the establishment of appropriate and validated assays and test procedures, or release criteria when an assay is unavailable, for the evaluation of cellular therapy products.

D8.1.3.1 Third-party manufacturers shall provide documentation of compliance to the Processing Facility.

D8.1.4 For all cellular therapy products, enumeration and viability assays shall be performed for clinically relevant cell populations.

D8.1.5 For tests required by these Standards performed within the Processing Facility:

D8.1.5.1 There shall be a process for monitoring the reliability, accuracy, precision, and performance of laboratory test procedures and instruments.

D8.1.5.2 New reagent lots shall be verified to provide comparable results to current lots or to give results in agreement with suitable reference material before or concurrently with being placed into service.

D8.1.5.3 Where available, controls shall be used each day of testing and shown to give results within the defined range established for that material.

D8.1.5.4 Function checks shall be performed for testing instruments, prior to testing donor, recipient, or cellular therapy product samples.

D8.1.5.5 For tests performed within the Processing Facility, there shall be documentation of ongoing proficiency testing as designated by the Processing Facility Director. The results shall be reviewed by the Processing Facility Director or designee and outcomes reviewed with the staff.

D8.1.6 Tests required by these Standards, not performed by the Processing Facility, shall be performed by a laboratory that is certified, licensed, or accredited by the appropriate laboratory regulatory agency.
D8.1.7 Laboratory testing required by these Standards shall be performed by a laboratory that is accredited, registered, or licensed in accordance with applicable laws and regulations.

D8.1.8 Infectious disease testing required by these Standards shall be performed using one or more screening tests approved or cleared by the governmental authority.

D8.1.9 Cellular therapy products that do not meet allogeneic donor eligibility requirements shall be distributed only if there is documented urgent medical need for the product. Documentation shall include, at a minimum, the approval of the recipient’s physician and the Processing Facility Medical Director or other designated physician.

D8.1.10 Notification of the recipient’s physician of nonconforming cellular therapy products and approval for their release shall be documented.

D8.2 Before a cellular therapy product is processed, shipped, or otherwise prepared for administration, there shall be a written request from the recipient’s physician specifying the cellular therapy product type, recipient and donor identifiers, the type of processing that is to be performed, and the anticipated date of processing.

D8.3 For allogeneic cellular therapy products, information required by the Processing Facility prior to distribution of the product shall include:

D8.3.1 A statement of donor eligibility.

D8.3.2 For ineligible donors, the reason for their ineligibility.

D8.3.3 Documentation of urgent medical need and physician approval for use, if applicable.

D8.4 Processing procedures shall be validated in the Processing Facility and documented to result in acceptable target cell viability and recovery.

D8.4.1 Published validated processes shall be verified within the Processing Facility prior to implementation.

D8.4.2 The Processing Facility shall use validated methods for preparation of cellular therapy products for administration.
D8.4.3 Cord blood units that have not been red cell reduced shall be diluted and/or washed.

D8.4.4 Cord blood units that have been red cell reduced should be diluted and/or washed.

D8.4.5 If the Processing Facility lacks experience with the type of cellular therapy product requested for a recipient, personnel shall obtain the manufacturer’s instructions and follow these instructions to the extent possible.

D8.4.5.1 The Processing Facility should verify the processing procedures utilizing practice units similar to the cellular therapy product intended for administration when feasible.

D8.5 Critical control points and associated assays shall be identified and performed on each cellular therapy product as defined in Standard Operating Procedures.

D8.6 Methods for processing shall employ aseptic technique and cellular therapy products shall be processed in a manner that minimizes the risk of cross-contamination.

D8.6.1 Where processing of tissues and cells involves exposure to the environment, processing shall take place in an environment with specified air quality and cleanliness.

D8.6.2 The effectiveness of measures to avoid contamination and cross-contamination shall be verified and monitored.

D8.7 The Processing Facility shall monitor and document microbial contamination of cellular therapy products after processing as specified in Standard Operating Procedures.

D8.7.1 The results of microbial cultures shall be reviewed by the Processing Facility Director or designee in a timely manner.

D8.7.2 The recipient’s physician shall be notified in a timely manner of any positive microbial cultures.

D8.8 Records shall be made concurrently with each step of the processing, testing, cryopreservation, storage, and administration or disposal/disposition/distribution of each cellular therapy product in such a way that all steps may be accurately traced.
D8.8.1 Records shall identify the person immediately responsible for each significant step, including dates and times of various steps, where appropriate.

D8.8.1.1 The Processing Facility shall maintain records of identification codes of personnel including methods to link the name and/or signature to the initials or other identification codes used in other documents and records. These records shall include dates of employment.

D8.8.2 Records shall show the test results and the interpretation of each result, where appropriate.

D8.9 The Processing Facility Director or designee shall review the processing record for each cellular therapy product prior to release or distribution.

D8.10 There shall be documented notification to the recipient’s physician and the Processing Facility Medical Director of clinically relevant processing end-points not met and remedial actions taken.

D8.11 Processing using more-than-minimal manipulation shall only be performed with Institutional Review Board or Ethics Committee approval, with the written informed consent of the donor, if applicable, and the recipient of the cellular therapy product, and in compliance with applicable laws and regulations.

D8.11.1 The Processing Facility shall adhere to current good manufacturing practices (cGMP) appropriate for the degree of cellular therapy product manipulation.

D8.12 For allogeneic cellular therapy products containing red blood cells at the time of administration:

D8.12.1 Results for ABO group and Rh type testing shall be available from two independently collected samples. Discrepancies shall be resolved and documented prior to issue of the cellular therapy product.

D8.12.2 Results for a red cell antibody screen on the recipient shall be available.

D8.13 There shall be a procedure to confirm the identity of cord blood units if confirmatory typing cannot be performed on attached segments.

D8.14 One or more samples representing the cryopreserved cellular therapy product shall be stored.
D8.14.1 Sample(s) from cryopreserved cellular therapy products shall be stored under conditions that achieve a valid representation of the clinical product.

D8.14.2 Cryopreserved samples shall be retained according to institutional Standard Operating Procedures.

SECTION D9: CELLULAR THERAPY PRODUCT STORAGE

D9.1 Processing Facilities shall control storage areas to prevent mix-ups, deterioration, contamination, cross-contamination, and improper distribution of cellular therapy products.

D9.2 STORAGE DURATION

D9.2.1 Processing Facilities, in consultation with the Clinical Program, shall establish policies for the duration and conditions of storage and indications for disposal.

D9.2.1.1 For directed cellular therapy products, recipients, donors, and associated Clinical Programs, should be informed about these policies as part of the informed consent process and before the cellular therapy product collection.

D9.2.2 Processing Facilities processing, storing, and/or releasing cellular therapy products for administration shall assign an expiration date and time, for non-cryopreserved products and for products thawed after cryopreservation.

D9.2.3 There shall be a written stability program that evaluates the viability and potency of cryopreserved cellular therapy products, minimally annually.

D9.3 TEMPERATURE

D9.3.1 Storage temperatures shall be defined in Standard Operating Procedures.

D9.3.2 Noncryopreserved cellular therapy products shall be maintained within a specific temperature range to maintain viability and function, to inhibit infectious agents, and for a period of time not to exceed that specified in Standard Operating Procedures.
D9.3.3 Cryopreserved cellular therapy products shall be stored within a temperature range, as defined in Standard Operating Procedures that is appropriate for the product and cryoprotectant solution used.

D9.3.4 For cryopreserved products received from an external facility, the Processing Facility shall confirm availability of adequate storage space at the appropriate temperature.

D9.4 PRODUCT SAFETY

D9.4.1 Materials that may adversely affect cellular therapy products shall not be stored in the same refrigerators or freezers as the cellular therapy products.

D9.4.2 For cellular therapy products immersed in liquid nitrogen, procedures to minimize the risk of cross-contamination of products shall be employed.

D9.4.3 Processes for storing cellular therapy products in quarantine shall be defined in Standard Operating Procedures.

D9.4.3.1 Quarantined cellular therapy products shall be easily distinguishable and stored in a manner that minimizes the risks of cross-contamination and inappropriate distribution.

D9.4.3.2 All cellular therapy products with positive infectious disease test results for relevant communicable disease agents and/or positive microbial cultures shall be quarantined.

D9.4.3.3 Processing Facilities storing cellular therapy products shall quarantine each product until completion of the donor eligibility determination as required by applicable laws and regulations.

D9.4.4 Prior to receipt of a cellular therapy product from an external facility, there must be confirmation that the product can safely be stored at the appropriate temperature.

D9.5 MONITORING
D9.5.1 Refrigerators and freezers used for storage where cellular therapy products are not fully immersed in liquid nitrogen shall have a system to monitor the temperature continuously and to record the temperature at least every four (4) hours.

D9.5.2 There shall be a mechanism to confirm that levels of liquid nitrogen in liquid nitrogen freezers are consistently maintained to assure that cellular therapy products remain within the specified temperature range.

D9.6 ALARM SYSTEMS

D9.6.1 Storage devices for cellular therapy products or reagents for cellular therapy product processing shall have alarm systems that are continuously active.

D9.6.2 Alarm systems shall have audible and visible signals or other effective notification methods.

D9.6.3 Alarm systems shall be checked periodically for function.

D9.6.4 If trained personnel are not always present in the immediate area of the storage device, a system shall be in place that alerts responsible personnel of alarm conditions on a 24-hour basis.

D9.6.5 Alarms shall be set to activate at a temperature or level of liquid nitrogen that will allow time to salvage products.

D9.6.6 Written instructions to be followed if the storage device fails shall be displayed in the immediate area of the storage device and at each remote alarm location.

D9.6.6.1 Instructions shall include a procedure for notifying processing personnel.

D9.6.6.2 Instructions shall outline procedures to follow to assure that cellular therapy products are maintained at safe temperatures and the process for documentation of any corrective actions in order to maintain integrity of the products.

D9.6.7 Storage devices of appropriate temperature shall be available for cellular therapy product storage if the primary storage device fails.

<td>Conditions shall be established and maintained to preserve the integrity and safety of cellular therapy products during transport or shipping.</td>
</tr>
<tr>
<td>Section D10.5</td>
<td>Cellular therapy products that are shipped to another facility or transported on public roads shall be packaged in an outer container.</td>
</tr>
</tbody>
</table>
D10.5.1 The outer container shall conform to the applicable regulations regarding the mode of transportation or shipping.

D10.5.2 The outer container shall be made of material adequate to withstand leakage of contents, shocks, pressure changes, and other conditions incident to ordinary handling during transport or shipping.

D10.5.2.1 The temperature of the shipping container shall be continuously monitored during shipment of cellular therapy products.

D10.5.2.2 The shipping facility shall maintain a record of the temperature over the period of travel.

D10.5.3 The outer container shall be secured.

D10.5.4 The outer container shall be labeled as defined in the Cellular Therapy Product Labels for Shipping and Transport on Public Roads table in Appendix II.

D10.5.5 There shall be a document inside the outer container that includes all the information required on the outer container, in conformity with the Cellular Therapy Product Labels for Shipping and Transport on Public Roads table in Appendix II.

D10.5.6 The outer container shall be labeled in accordance with applicable laws and regulations regarding the cryogenic material used and the transport or shipment of biological materials.

D10.6 The transit time shall be within time limits determined by the receiving and/or distributing facility to maintain cellular therapy product safety.

D10.7 The cellular therapy product shall be transported by a qualified courier.

D10.8 There shall be plans for alternative means of transport or shipping in an emergency.

D10.9 The cellular therapy products should not be passed through X-Ray irradiation devices designed to detect metal objects. If inspection is necessary, the contents of the container should be inspected manually.
SECTION D11: DISTRIBUTION AND RECEIPT

D11.1 DISTRIBUTION CRITERIA

D11.1.1 The processing, collection, and transport or shipping records for each cellular therapy product shall be reviewed by the Processing Facility Director or designee for compliance with Standard Operating Procedures and applicable laws and regulations prior to product release or distribution.

D11.1.1.1 Records shall demonstrate traceability from the donor to the recipient and from the recipient to the donor.

D11.1.2 Each cellular therapy product shall meet pre-determined release criteria prior to distribution from the Processing Facility. The release criteria shall include donor eligibility determination for allogeneic products, if applicable.

D11.1.2.1 The Processing Facility Director or designee shall give specific authorization for release when the cellular therapy product does not meet technical release criteria.

D11.1.2.2 The Processing Facility Medical Director or designee shall give specific authorization for release when the cellular therapy product does not meet clinically relevant release criteria.

D11.1.2.3 Documentation of agreement of the Processing Facility Medical Director or designee and the recipient’s physician consent to use any non-conforming product shall be retained in the processing record if such release is allowed by policies, procedures, or package inserts of licensed products.

D11.1.3 Each cellular therapy product issued for administration shall be visually inspected by two (2) trained personnel immediately before release to verify the integrity of the product container and appropriate labeling.

D11.1.3.1 A cellular therapy product shall not be released when the container is compromised and/or recipient or donor information is not verified unless the Processing Facility Director or designee gives specific authorization for the product’s release.

D11.1.4 For each type of cellular therapy product, the Processing Facility shall maintain and distribute or make a document available to clinical staff containing the following:
D11.1.4.1 The use of the cellular therapy product, indications, contraindications, side effects and hazards, dosage, and administration recommendations.

D11.1.4.2 Instructions for handling the cellular therapy product to minimize the risk of contamination or cross-contamination.

D11.1.4.3 Appropriate warnings related to the prevention of the transmission or spread of communicable diseases.

D11.2 The cellular therapy product processing records shall contain a written record of product distribution including, at a minimum:

D11.2.1 The distribution date and time.

D11.2.2 Unique identifier of the intended recipient.

D11.2.3 The proper product name and identifier.

D11.2.4 Documentation of donor eligibility determination.

D11.2.5 Identification of the facilities that requested and distributed the product.

D11.3 Records shall permit tracing of the cellular therapy product from one facility to another, and shall include:

D11.3.1 Date and time cellular therapy product was distributed.

D11.3.2 Date and time cellular therapy product was received.

D11.3.3 Identity of the transporting or shipping facility.

D11.3.4 Identity of the receiving facility.

D11.3.5 Identity of personnel responsible for cellular therapy product transportation or shipping and of personnel responsible for receiving the product.
D11.3.6 Identity of the courier.

D11.3.7 Documentation of any delay or problems incurred during transportation or shipping.

D11.4 RECEIPT OF CELLULAR THERAPY PRODUCTS

D11.4.1 Procedures shall be established and maintained for acceptance, rejection, and quarantine of cellular therapy products.

D11.4.2 The receipt of each cellular therapy product shall include inspection to verify:

D11.4.2.1 The integrity of the cellular therapy product container.

D11.4.2.2 The appearance of the cellular therapy product for evidence of mishandling or microbial contamination.

D11.4.2.3 Appropriate labeling.

D11.4.3 If the primary container or temperature of the cellular therapy product has been compromised, the Processing Facility Director or designee shall give specific authorization to return the product to inventory.

D11.4.4 There shall be procedures to verify that the cellular therapy product was appropriately transported or shipped.

D11.4.4.1 The receiving facility shall document the temperature of the outer container upon arrival.

D11.4.4.2 For cryopreserved cellular therapy products, receiving facility records shall include documentation of the outer container temperature during shipping.

D11.4.5 The receiving facility shall review and verify product specifications provided by the manufacturer, if applicable.

D11.4.6 There shall be procedures to maintain cellular therapy products in quarantine until they have been determined to meet criteria for release from quarantine.
D11.4.7 The receiving facility shall have readily available access to a summary of documents used to determine allogeneic donor eligibility.

D11.4.7.1 For cellular therapy products received from an external facility, there shall be documented evidence of donor eligibility screening and testing in accordance with applicable laws and regulations.

D11.4.8 When cellular therapy products are returned to the Processing Facility after distribution for administration, there shall be documentation in the Processing Facility records of the events requiring return, the temporary storage temperature when at the clinical facility, the results of inspection upon return, and subsequent action taken to protect product safety and viability.

D11.4.8.1 The Processing Facility Director or designee shall consult with the recipient’s physician regarding reissue or disposal of the returned product.

SECTION D12: DISPOSAL

D12.1 Disposal of cellular therapy products shall include the following requirements:

D12.1.1 A pre-collection written agreement between the storage facility and the designated recipient or the donor defining the length of storage and the circumstances for disposal of cellular therapy products.

D12.1.2 The option to transfer the cellular therapy product to another facility if the designated recipient is still alive after the agreed upon storage interval.

D12.1.3 Documentation of no further need for the cellular therapy product before any product is discarded.

D12.1.4 Approval by the Processing Facility Medical Director or the recipient’s physician for cellular therapy product discard or other disposition, and method of disposal.

D12.1.5 A method of disposal and decontamination that meets applicable laws and regulations for disposal of biohazardous materials and/or medical waste.

D12.1.6 Processing Facilities, in consultation with the Clinical Program, shall establish policies for the duration and conditions of storage and indications for disposal.
D12.1.6.1 For directed cellular therapy products, recipients, donors, and associated Clinical Programs should be informed about these policies as part of the informed consent process and before the cellular therapy product collection.

D12.1.7 If there is no pre-existing agreement describing conditions for cellular therapy product storage and/or discard or if the patient is lost to follow-up, the storage facility shall:

D12.1.7.1 Make a documented effort to notify the donor, cellular therapy product manufacturer, or designated recipient physician and facility about product disposition, including disposal or transfer.

D12.2 The records for discarded or transferred cellular therapy products shall indicate the product was discarded or transferred, date of discard or transfer, disposition, and method of disposal or transfer.

SECTION D13: RECORDS

D13.1 There shall be a records management system for quality and cellular therapy product record creation, assembly, review, storage, archival, and retrieval.

D13.1.1 The records management system shall facilitate the review of records pertaining to a particular cellular therapy product prior to distribution and for follow-up evaluation or investigation.

D13.1.2 The records management system shall facilitate tracking of the cellular therapy product from the donor to the recipient or final disposition and tracing from the recipient or final disposition to the donor.

D13.1.3 For cellular therapy products that are to be distributed for use at another institution, the Processing Facility shall inform the receiving institution of the requirement for tracking the product at or before the time of product distribution.

D13.1.4 Records shall be maintained in such a way as to secure their integrity, preservation, and retrieval.

D13.1.5 Records shall be accurate, legible, and indelible.
D13.1.6 Safeguards to secure the confidentiality of all records and communications between the collection, processing, and transplant facilities, and their recipients and donors shall be established and followed in compliance with applicable laws and regulations.

D13.2 ELECTRONIC RECORDS

D13.2.1 The Processing Facility shall establish and maintain a current listing of all critical electronic record systems. Critical electronic record systems shall include at a minimum systems under the control of the Processing Facility that are used:

D13.2.1.1 As a substitute for paper.

D13.2.1.2 To make decisions.

D13.2.1.3 To perform calculations.

D13.2.1.4 To create and/or store information used in critical procedures.

D13.2.2 For all critical electronic record systems, there shall be policies, procedures, and system elements to maintain the accuracy, integrity, identity, and confidentiality of all records.

D13.2.2.1 There shall be a means by which access to electronic records is limited to authorized individuals.

D13.2.2.2 The critical electronic record system shall maintain unique donor, cellular therapy product, and recipient identifiers.

D13.2.2.3 There shall be protection of the records to enable their accurate and ready retrieval throughout the period of record retention.

D13.2.3 For all critical electronic record systems, there shall be an alternative system for all electronic records to allow for continuous operation of the Processing Facility in the event that critical electronic record systems are not available. The alternative system shall be validated and Processing Facility staff shall be trained in its use.
D13.2.4 For all critical electronic record systems, there shall be written procedures for record entry, verification, and revision.

D13.2.4.1 A method shall be established or the system shall provide for review of data before final acceptance.

D13.2.4.2 A method shall be established or the system shall provide for the unambiguous identification of the individual responsible for each record entry.

D13.2.5 For all critical electronic record systems, there shall be the ability to generate true copies of the records in both human readable and electronic format suitable for inspection and review.

D13.2.6 For all critical electronic record systems, there shall be validated procedures for and documentation of:

D13.2.6.1 Systems development.

D13.2.6.2 Numerical designation of system versions, if applicable.

D13.2.6.3 Prospective validation of systems, including hardware, software, and databases.

D13.2.6.4 Installation of the system.

D13.2.6.5 Training and continued competency of personnel in systems use.

D13.2.6.6 Monitoring of data integrity.

D13.2.6.7 Back-up of the electronic records system on a regular schedule.

D13.2.6.8 System maintenance and operations.

D13.2.6.9 System assignment of unique identifiers for donors, cellular therapy products, or recipients.
D13.2.7 All system modifications shall be authorized, documented, and validated prior to implementation.

D13.3 RECORDS TO BE MAINTAINED

D13.3.1 Processing Facility records related to quality control, personnel training or competency, facility maintenance, facility management, complaints, or other general facility issues shall be retained for a minimum of ten (10) years by the Processing Facility, or longer in accordance with applicable laws or regulations, or with a defined program or institution policy.

D13.3.1.1 Facility maintenance records pertaining to facility cleaning and sanitation shall be retained for at least three (3) years or longer in accordance with applicable laws or regulations, or with defined program or institution policy. All other facility maintenance records shall be retained as in D13.3.1.

D13.3.1.2 Records to allow tracing of cellular therapy products shall be maintained for a minimum of ten (10) years after final distribution of the product, or as required by applicable laws and regulations. These records shall include collection and processing facility identity, unique numeric or alphanumeric identifier, collection date and time, product identity, and donor and recipient information as found on the original container.

D13.3.1.3 All records pertaining to the processing, testing, storage, or distribution of cellular therapy products shall be maintained for a minimum of ten (10) years after the date of administration, or if the date of administration is not known, then a minimum of ten (10) years after the date of the cellular therapy product’s distribution, disposition, or expiration, or the creation of the cellular therapy product record, whichever is most recent, or according to applicable laws and regulations or institutional policy, whichever requires the longest maintenance period.

D13.4 RECORDS IN CASE OF DIVIDED RESPONSIBILITY

D13.4.1 The Processing Facility shall maintain a listing of the names, addresses, and responsibilities of other facilities that perform manufacturing steps on a cellular therapy product.

D13.4.2 The Processing Facility shall furnish to the facility of final disposition a copy of all records relating to the collection, processing, and storage procedures performed in so far as the records concern the safety, purity, or potency of the cellular therapy product involved.
D13.4.3 If two (2) or more facilities participate in the collection, processing, or distribution of the cellular therapy product, the records of the Processing Facility shall show plainly the extent of its responsibility.
MINIMUM NUMBER OF NEW PATIENTS

Clinical Programs shall administer cellular therapy to at least the following number of new patients\(^1\) before initial accreditation and annually thereafter:

<table>
<thead>
<tr>
<th>Patient Population</th>

</tbody>
</table>

\(^1\) The term “new allogeneic patient” or “new autologous patient” includes a patient who will be receiving his/her first cellular therapy.

\(^2\) A Clinical Program that is accredited for allogeneic cellular therapy meets the numeric requirement for autologous cellular therapy.

\(^3\) For clinical sites performing only autologous cellular therapy.
## APPENDIX II

### CELLULAR THERAPY PRODUCT LABELING

Each label shall include at least the elements detailed in the following table:

<table>
<thead>
<tr>
<th>Element</th>
<th>Partial label</th>
<th>Label at completion of collection</th>
<th>Label at completion of processing</th>
<th>Label at distribution for administration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unique numeric or alphanumeric identifier&lt;sup&gt;4&lt;/sup&gt;</td>
<td>AF</td>

<sup>AF=Affix, AT=Attach or Affix, AC=Accompany, Attach or Affix</sup>

<sup>1</sup>Product proper names and attributes are listed in Chapter Three of the ISBT 128 Standard Terminology for Blood, Cellular Therapy, and Tissue Product Descriptions. Available at: [www.iccbba.org](http://www.iccbba.org) > Subject Area > Cellular Therapy > Standard Terminology.

<sup>2</sup>Products thawed at the bedside do not require a new label.

<sup>3</sup>Facilities registered with ICCBBA, Inc. who have fully implemented ISBT 128 labeling shall follow the ISBT 128 Standard for the location of information on the label and/or the accompanying documentation.

<sup>4</sup>Overlay labels for supplementary identifiers shall not obscure the original identifier.
APPENDIX III

CELLULAR THERAPY PRODUCT LABELS FOR SHIPPING AND TRANSPORT ON PUBLIC ROADS

Each container for shipping and transport on public roads shall include a document on the inside of the container and a label on the exterior of the container with at least the elements detailed in the following table:

<table>
<thead>
<tr>
<th>Element</th>
<th>Inner container document</th>
<th>Outer container label</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date of distribution, if appropriate</td>
<td>AC</td>
<td>AF</td>
</tr>
<tr>
<td>Time(^1) of distribution, if appropriate</td>
<td>AC</td>
<td>AF</td>
</tr>
<tr>
<td>Statement “Do Not X-Ray” and /or “Do Not Irradiate”, if applicable</td>
<td>AC</td>
<td>AF</td>
</tr>
<tr>
<td>Statements “Human Cells for Administration” or equivalent and</td>

</tr>
<tr>
<td>Receiving facility name, street address, contact person, and phone number</td>
<td>AC</td>
<td>AF</td>
</tr>
<tr>
<td>Biohazard and/or Warning Labels (as applicable, see CM7.4, C7.4, D7.4)</td>
<td>AC</td>
<td></td>
</tr>
<tr>
<td>If applicable:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Statement “NOT EVALUATED FOR INFECTIOUS SUBSTANCES”</td>
<td>AC</td>
<td></td>
</tr>
<tr>
<td>Statement “WARNING: Advise Patient of Communicable Disease Risks”</td>
<td>AC</td>
<td></td>
</tr>
<tr>
<td>Statement “WARNING: Reactive Test Results for [name of disease agent or disease]”</td>
<td>AC</td>
<td></td>
</tr>
</tbody>
</table>

AC= Accompany on a single document, AF=Affix

\(^1\)Time shall include the time zone when shipping or transport of the cellular therapy product involves crossing time zones.
## ACCOMPANYING DOCUMENTS AT DISTRIBUTION

Products collected in or designated for use in the U.S. shall be accompanied upon leaving the Collection or Processing Facility with at least the elements detailed in the following table:

<table>
<thead>
<tr>
<th>Documentation</th>
<th>Allogeneic Donor-Eligible</th>
<th>Allogeneic Donor-Ineligible&lt;sup&gt;1&lt;/sup&gt;</th>
<th>Allogeneic Donor-Incomplete&lt;sup&gt;1&lt;/sup&gt;</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statement that the donor has been determined to be either eligible or ineligible, based upon results of donor screening and testing</td>
<td>X</td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>Summary of records used to make the donor-eligibility determination&lt;sup&gt;2&lt;/sup&gt;</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Name and address of the establishment that made the donor-eligibility determination</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Listing and interpretation of the results of all communicable disease testing performed</td>
<td>X</td>
<td>X</td>
<td>X</td>
</tr>
<tr>
<td>Statement that the communicable disease testing was performed by a laboratory meeting regulatory requirements&lt;sup&gt;3&lt;/sup&gt;</td>
<td>X</td>
<td>If applicable</td>
<td>If applicable</td>
</tr>
<tr>
<td>Statement noting the reason(s) for the determination of ineligibility</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Statement that the donor-eligibility determination has not been completed</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Statement that the product must not be transplanted or infused until completion of the donor-eligibility determination, except under condition of urgent medical need</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Listing of any required screening or testing that has not yet been completed</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Results of donor screening that has been performed</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Documentation that the physician using the cellular therapy product was notified of incomplete testing or screening</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Instructions for product use to prevent the introduction, transmission, or spread of communicable diseases</td>
<td>X</td>
<td>X</td>
<td>X</td>
</tr>
<tr>
<td>Instructions for reporting serious adverse reactions or events to the distributing facility&lt;sup&gt;4&lt;/sup&gt;</td>
<td>X</td>
<td>X</td>
<td>X</td>
</tr>
</tbody>
</table>

<sup>1</sup> May only be distributed after release by the Processing Facility Medical Director due to urgent medical need. For ineligible cellular therapy products or incomplete donor eligibility determination, the product must be shipped in quarantine. For products distributed prior to completion of donor eligibility, you must complete the determination and inform the physician of the results.

<sup>2</sup> Access (electronic or otherwise) to the source documents by the distributing facility and/or receiving facility is sufficient.

<sup>3</sup> Includes laboratories certified under CLIA of 1988, as amended from time to time, those that have met equivalent requirements as determined by the Centers for Medicare and Medicaid Services, or those that have met equivalent non-U.S. requirements.

<sup>4</sup> Access to the Clinical Program SOPs and forms could suffice when the distributing and clinical facilities are within the same building.

<sup>5</sup> For autologous donors, a donor eligibility determination is not required by FDA. However, if any donor screening or testing is performed and risk factors or reactive test results are identified, accompanying documentation must be provided.
